The Pittsburgh Community
National Register Nomination Proposal

By

Students in History 8700 Case Studies in Historic Preservation
Georgia State University

May 4, 2004
SECTION 1

GENERAL INFORMATION

1. Historic Name of District (see Section 3.B.1): Pittsburgh

2. Location of District: The Pittsburgh neighborhood is located just south and west of downtown Atlanta. Several key routes including Interstate 75/85, University Avenue, and Metropolitan Parkway surround the community; rail lines form the eastern barrier separating Pittsburgh from neighboring Mechanicsville.

City or vicinity of: Atlanta County: Fulton

Zip Codes of the district: 30310 and 30315

Approximate distance and direction from county seat: (same)

3. Acreage of district to be nominated (approximately): 323.8 acres

4. a. Total Number of Historic/Contributing Resources in district (Section 2.A): 950. This number includes contributing resources bounded by Stephens and Shelton Streets on the North, University Avenue on the South, the Southern Railroad on the East, and Metropolitan Parkway on the West.

b. Total Number of Noncontributing Resources in district (Section 2.A): 268.

5. Are a majority of buildings in the district less than 50 years old? No.

6. Property Ownership

Does a federal agency own property within the district? No.

NOTE: A letter of support for the district nomination from an agency or organization that represents property owners in the district must be included with the HDIF. See attached.

NOTE: In districts of 50 property owners or less, a list of the property owners of record must be submitted. N/A

Do the property owners within the district support nomination of the district to the National Register? Nomination is supported by the Pittsburgh Community Improvement Association, Inc.

Have any of the following been informed about the nomination of this district to the National Register? What has been their involvement, if any, in the nomination process?

Regional Development Center: No.

County government: No.

City government: Atlanta Urban Design Commission supports the National Register Nomination and has provided technical assistance.

Local historical society or preservation organization: The Atlanta Preservation Center supports the designation.

Neighborhood, homeowners', or civic association: Pittsburgh Community Improvement
Association supports National Register Nomination and has provided information regarding the history of the community.

**Business association:** No.

Is the nomination of the district part of a larger formal or informal preservation program in the area? No.

7. **Sponsor of Nomination.**

_Name(s) of local sponsor:_ Reverend Ronnie Galvin

_Organization or agency (if applicable):_ Pittsburgh Community Improvement Association

_Mailing Address:_ P.O. Box 11348

_City:_ Atlanta  
_State:_ Georgia  
_Zip Code:_ 30310

_Telephone—Monday-Friday daytime and/or work:_ 678-754-2778

_E-mail:_ soultrust@earthlink.net

8. **Form prepared by**

_Name:_ Case Studies in Historic Preservation Class, HIST 8700, Spring 2004, Richard Laub, Instructor

_Title and Organization or Company, if any:_ Georgia State University, Department of History, Heritage Preservation Program

_Mailing Address:_ 38 Peachtree Center Avenue, 805 General Classroom Building

_City:_ Atlanta  
_State:_ Georgia  
_Zip Code:_ 30303

_Telephone—Monday-Friday daytime and/or work:_ 404-463-9206

_E-mail:_ hisrel@langate.gsu.edu

_Date:_ March 23, 2004

**What is your relationship to or interest in the district?** Class project.

9. **Reasons for nominating the district**

_Recognition:_ Pittsburgh is being nominated for the National Register of Historic Places in order to highlight its importance as a largely intact historic African American neighborhood which contains good extant examples of vernacular architecture and which is an important part of the overall development of Atlanta.

_Grant Assistance:_ No.

_Tax Incentives:_ No.
Protection: Section 106 of the National Historic Preservation Act will help ensure that the
neighborhood of Pittsburgh will be taken into account when potential Federal undertakings are
proposed in the vicinity. Designation as a local historic district will provide for further protection.

Part of a larger preservation plan: Once Pittsburgh is listed in the National Register of Historic
Places, Pittsburgh Community Improvement Association, along with the Atlanta Urban Design
Commission, will work to designate the neighborhood as a local historic district. This local
designation will provide further regulation concerning changes to historic properties within the district,
as well as new construction and demolition.

Minority Resource: Pittsburgh is important as a minority resource because it was historically a
predominantly African American neighborhood and remains so today.

Other public interest in this nomination: N/A

SECTION 2
DESCRIPTION

A. Number of Contributing and Noncontributing Resources:

Provide the number of each type of contributing resource in the district.
Buildings: 950
Structures: None.
Sites: None.
Objects: None.

Provide the number of each type of noncontributing resource.
Buildings: 268.
Structures: None.
Sites: None.
Objects: None.

B. Description

1. Summary description:
The Pittsburgh neighborhood is a large, urban, primarily residential neighborhood located in
Atlanta, south of Mechanicsville, east of Adair Park, west of the Southern Railroad and north of
University Avenue. Downtown Atlanta is less than two miles to the northeast. The
neighborhood is bounded to the north by Shelton and Stephens Streets; to the west by
Metropolitan Parkway (formerly Stewart Avenue); to the east by the Southern Railroad; and to
the south by University Avenue. Its eastern boundary has been severed down by the
construction of the 75/85 Interstate system in Atlanta.

North/south thoroughfares include Metropolitan Parkway and Welch, Coleman, and McDaniel
Streets. East/west thoroughfares include University Avenue and Fletcher and Arthur Streets.
The oldest section of the neighborhood is the southeast corner near the railroad tracks. The
newer parts of the neighborhood (west toward Metropolitan Parkway) contain many early 20th
century bungalows.
The railroad lines shaped Pittsburgh both physically and historically. The rebuilding of the rail lines after the Civil War and the availability of jobs in the rail yards provided the impetus for the development of the Pittsburgh community. The East Tennessee, Virginia, and Georgia Railroad companies completed construction of extensive rail maintenance shops in 1883. The community developed as a primarily African American community, with settlement occurring to the west of the rail lines and shops. Steady employment and segregated conditions gave birth to a variety of African American-owned homes, business, churches, and schools.

The Pittsburgh neighborhood includes both single- and multi-family residences; it is an area with little industry and where urban renewal programs have had little impact.

There are several industrial buildings to the north of the neighborhood. There are also many vacant lots throughout the neighborhood. (See Pittsburgh National Register Proposal Map.)

2. Natural terrain, natural landmarks, geographic features in and around the district:
The neighborhood is composed of gently rolling hills, with the highest points located to the east near the railroad. The railroad forms the eastern boundary of the district. Views of downtown Atlanta are visible from these higher elevations.

Like other surrounding historic neighborhoods, the interior portion of the residential area has numerous trees, including oak, pine, maple, and dogwood. Some yards are well maintained with shrubs, bushes, planted trees, and mown lawns; however, most yards are not landscaped.

3. Distinct parts, areas, or sections of the district:
The population of the area is primarily African American. It is largely residential from University Avenue northward to Shelton and Stephens Streets. Commercial businesses are interspersed within the residential area. Many commercial properties are located along McDaniel Street and Metropolitan Parkway. No single neighborhood center dominates.

There are two apartment complexes in the neighborhood, distinct from the surrounding predominantly single-family housing. The Pittsburgh Civic League Apartments [see photograph 5], constructed in 1972 at 801 McDaniel Street, is a 120-unit apartment complex, consisting of five residential buildings (2- and 3-bedroom units), as well as a laundry and maintenance building. The Crogman School Apartments (studio, 1-, 2- and 3-bedroom units) at 1093 West Avenue is a new complex. One of its two buildings is the rehabilitated 1922 Crogman School [see photograph 62].

The Salvation Army compound should also be considered a distinct area of the community and is more thoroughly described in Section 7.

4. Pattern of land subdivision, including street layout, lot layout, alignment of major highways, field systems, etc.; and relationship of this pattern of land subdivision to the natural terrain and to the physical development of the district:
The location of neighborhood was dictated by the pre-existing railroad. The neighborhood forms a roughly triangular shape with the railroad running from the northwest portion of the neighborhood to the southeastern corner. Neighborhood streets are laid out in a grid pattern, with minor shifts to accommodate terrain. McDaniel Street is the main north-south thoroughfare. In general, lots are small (often 30 feet by 100 feet) with little room for off-street parking. Constructed in the early 1960s, Interstate 75/85 runs north and south
5. Arrangement or placement of buildings and structures on lots within the district; relationship of buildings and structures to one another and to their surroundings; density of development:
Most of the houses are set close to the street, and have small front yards with narrow side yards and a larger back yard. Some of the houses are built above street level, with retaining walls (from the front yard to sidewalk) constructed of brick, stone, or concrete. Most of the streets in Pittsburgh are paved with asphalt; however, some are composed of crushed rock and poured concrete. Concrete sidewalks are found throughout the neighborhood—sometimes on just one side of the street—and in some places, hexagonal pavers remain. Curbing is predominantly poured concrete, with some granite. Streetlights are aluminum.

6. Architectural characteristics of the district, including: periods, styles, and types of buildings and structures; design qualities, scale and proportion, construction materials and techniques, and workmanship:
The majority of the contributing properties in Pittsburgh are single-story. The dates of these contributing structures vary from late the 19th century to the mid-20th century. There are no high-style buildings in this neighborhood. Most of the homes are wood frame, stud wall construction. Exterior surfaces include clapboard (horizontal and vertical), brick, concrete block, asbestos shingle and vinyl. Roofing materials are typically asphalt shingles of varying designs. Foundations are predominantly brick piers with concrete block infill.

While pockets of similar residential structures exist in Pittsburgh—such as rows of shotguns—most streets show a wide variety of house types. Pittsburgh is comprised of mostly single-family residences with some multi-family units interspersed through the neighborhood. Houses in this area were built from the 1880s and include the following types: gabled-ell, side gabled, side hall, hall and parlor, Georgian cottage, American foursquare, central hallway, pyramidal, New South, single shotgun, and double shotgun as well as bungalows and ranch houses. The main architectural styles represented are Folk Victorian and Craftsman. A rectangular Craftsman bungalow can be found at 1130 McDaniel Street [see photograph 52]. Contributing Craftsman two-story apartment buildings can be seen at 1152 and 1158 Metropolitan Parkway [see photograph 43].

Side-gable cottages, typically built in the second quarter of the 20th century, feature a side-gable roof and a simple floor plan that usually includes a corridor. The side-gable cottage is similar to the side-gable bungalow, but has a simpler floor plan. Nearly all of these house types include front porches for outdoor living space. They have no academic style (except for Folk Victorian ornament in a few examples).

Numerous shotgun houses, both single and double, were built in the area. Shotgun houses are one-room wide and two- or three-rooms deep, with a front porch that provides outdoor living space. Stylistically, many shotguns are either plain or feature Folk Victorian ornament, especially on the porch or the front gable end. Shotgun houses are often grouped together, forming unbroken rows along the street. For example, a row of five double shotguns are located at 1181 to 1189 McDaniel Street [see photograph 50]. They are joined together in the back, to form a continuous row of housing. The yards of these double shotguns are small; each front yard is surrounded by a picket fence. Folk Victorian single shotgun houses are located at 1107 Sims Street [see photograph 48] and 828 Welch Street [see photograph 9]. Other double-
shotguns are at 866 Welch Street [see photograph 16.], 791 Coleman Street [see photograph 4], and 534 Rockwell Street [see photograph 10].

Gabled-ell houses with a projecting gable-front and side wing are common, as are pyramidal cottages, which are characterized by a hipped roof, and most often are in the style of Folk Victorian cottages. A Folk Victorian gabled-ell cottage can be found at 525 Roy Street [see photograph 47]. A New South cottage stands at 967 Welch Street [see photograph 36]. A pyramidal residence stands at 879 Coleman Street [see photograph 19]. An extended hall-parlor dwelling is located at 246 Roy Street [see photograph 60].

Bethany Educational Building [see photograph 53], at the corner of McDaniel and Roy Streets, is in the International style and appears to have been a commercial structure with living quarters above. The commercial buildings at 842 McDaniel Street [see photograph 6] and 543 Rockwell Street [see photograph 11] have Italianate influences.

7. **Detailed description of all community landmark buildings within the district. Include dates of construction; an architectural description with building type, style, distinctive features; and architect or builder (if known); and use (historic and current):**

Few buildings were constructed after World War II. (For the most part, the community was already developed by the beginning of the war; the 2000 U.S. Census showed the median building construction date to be 1939). Included among the few post-war buildings is the Bethany Education Building, located at 1113 McDaniel Street [see photograph 53]. Constructed in the International style, it has a flat roof and a band of windows across the second floor.

The Pittsburgh neighborhood includes numerous commercial buildings. Several two-story brick and concrete commercial buildings are located along McDaniel Street, e.g., the (Walter Leonard) Parks Building at 842 McDaniel Street [see photograph 6], constructed in 1920, which originally housed an ice cream and confectionary shop.

Commercial establishments still exist in the neighborhood although many commercial buildings are vacant. Today, most of the businesses are along University Avenue and Metropolitan Parkway. McDaniel Street, which was traditionally the commercial strip, has lost many of its original commercial buildings to new apartment construction. There were several grocers and a meat market on McDaniel Street by 1900.

**Commercial Properties** (construction date in parentheses)

**Booker Street**
- 1175, former grocery [Joseph Moreland Grocer 1930] (1965) [See photograph 67]

**Fletcher Street**
  [See photograph 63]
- 332, abandoned store (1953) [See photograph 55]

**Ira Street**
- 1187, store/coin laundry (1930)

**Mayland Circle,**
- 1120, Bailey's Beauty Salon

**McDaniel Street**
- 842, Parks Building, now empty [Green D. Parks Soft Drinks in 1930] (1920)
  [See photograph 6]
- 847, Shorty’s Beepers [site of Rakestraw Richmond Restaurant 1930] (1950)
917, Sellers Brothers Funeral Home
930, PM building; Prince Martin is current owner [Mayfield Barber Shop pre-1930]
932, A & D Soul Food [Robert C. Hawkins Second Hand Furniture 1940]
950, Pittsburgh Barber Shop [Cowell E. Vaughan Barber 1950] (1948)
989, Great Savings Grocery [pre-1970 census]
1029, Kings Food [Yates and Milton Pharmacy 1960] (1945)
1029½, Laundromat (behind Kings Food)
1105, formerly Rowland Beauty Salon [site of John Robinson Soft Drinks 1930] (1940)
[See photograph 54]

Metropolitan Parkway
762, abandoned store (1955)
836, J&R Foods, Inc. (1930)
934, Metropolitan Auto Shop [site of Tire and Battery Service/Used Cars 1940] (1960)
944, S & S Foodmart [Auby A. Dukes Gas Station 1930] (1930)
944A, Auto Repair Shop
1110, two storefronts, now empty [Samuel W. Hatton Druggist 1930] (1920)
1190, Mrs. Winner's Fried Chicken (1983)
Amoco Oil Company gas station (no street address in tax digest; located at the
southeast corner of Metropolitan Parkway and University Avenue)

Rockwell Street
543, Winston's Grocery [site of Sidney Zimmerman Grocer 1930] (1945)
[See photograph 11]

University Avenue
245, Carey Limousine Service (1930)
339, Brook's Cafeteria [Bill's Steak House pre-1960] (1954)
409, strip building with several stores [Super Test Oil Co. & Service Station 1960]
(1957)

Community landmark buildings in the neighborhood include several historic churches. The
larger church buildings are usually constructed of brick. The Ariel Bowen United Methodist
Church at 384 Arthur Street [see photograph 30], the oldest church in the neighborhood, was
constructed in 1904. Larger brick churches include the New Mount Calvary Baptist Church at
268 Roy Street [see photograph 59], the Hurt Street Baptist Church at 977 McDaniel Street and
the Bethany Church at 1107 McDaniel Street. Other churches are located in converted homes
and stores.

Churches (construction dates in parentheses)
Arthur Street
  384, Ariel Bowen Methodist Church (1935) [See photograph 30]
  447, St. Peter FBH Church (1965, possibly 1940) [See photograph 34]
Booker Avenue
  1162, Rose of Sharon Early Church of God and Christ (1942 was a residence)
  1176, New Hope Baptist Church (1960)
Coleman Street
  931, St. Marks Spiritualist Church (1938)
Fortress Avenue
  1147, New Shield of Faith Christian Ministries (1928)
Gardner Street
385, Overcoming Church of God Faith Tabernacle (1948)
Garibaldi Street
1094, Southside Springfield Baptist Church (1947)
Hubbard Street
440, New Hope Church in Christ (1960) [See photograph 21]
Ira Street
1113, Holy Temple Church of God (1920)
Metropolitan Parkway
900, Gideon Divine Healing Temple (1960)
1136, House of Prayer Baptist Church (1925)
McDaniel Street
898, Temple of Hope [Cleansers 1940] (1909)
940, House of Prayer [George Azar Restaurant 1940] (1925)
942, Tabernacle of Praise [Alda W. Mitchell Dry Goods 1930]
944, Christ Liberty Temple [Great Savings Grocer 1930s]
977, Hurt Street Baptist Church (1940 St. Mark’s Evangelical Lutheran Church)
1050, Iconium Baptist Church (pre-1910)
1109, Bethany Baptist Church [a Bethany Baptist Church existed here in 1930](1960)
[See photograph 53]
1113, Bethany Baptist Church Education Building (1951)
Rockwell Street
534, Pentecostal Holiness Church of the Living God (1920 was a grocery) (1920)
[See photograph 10]
Roy Street
268, New Mount Calvary Baptist Church (1960) [See photograph 59]
Sims Street
1030, Sunnyside Baptist Church (1928)
1148, Word of God New Life Ministries (1930) [See photograph 49]
Smith Street
1090, Mount Moriah Primitive Baptist Church (1956)
1131, St. Peter’s Baptist (1956 as Mount Pleasant Baptist Church)
1117, Faith Tabernacle Baptist (1935 as Little Zion Baptist)
West Avenue
1072, The Church and Kingdom of Christ (1955)
Windsor Street
1166, Straight Life Church of Christ Pentecost (1954)

Community buildings
There is an unused community building (non-contributing) at 935 Coleman (part of the same parcel as 931 Coleman—St. Marks Spiritualist Church). It may be used as a church or even as a residence today. Historically, it was the site of Rice Memorial Presbyterian Church, constructed in 1925. Another community center is located at 963 Windsor Street (part of Pittman Park).

Public Housing Units: (contributing)
Bender Street: 772 (1964)
Beryl Street: 795 (1960)
Coleman Street: 757 (1955) [See photograph 3]; 771 (1960)
Delevan: 200s and 300s (c. 1950)
Fletcher Street: 394, 400 (1925)
Humphries Street: 765 (1955); 814 and 820 (1950)
Two historic and one non-contributing schools are located in the neighborhood. The Crogman School [see photograph 62], located at 1093 West Avenue, was named for the late William Henry Crogman, a professor and the first African American president of Clark College (now Clark Atlanta University). Crogman School was constructed in 1922, and has been converted to apartments (one additional apartment building has been built on the grounds). It is a large three-story brick building designed by A. Ten Eyck Brown in the Beaux Arts classical style. The main entrance is a large archway. The Charles L. Gideons Elementary School (named for a longtime employee of the Atlanta school system) at 897 Welch Street [see photograph 17] was constructed in 1959 and is a complex of brick buildings with some International style elements. The buildings are not aligned towards the street, rather their short ends face the street and the long sides face each other with courtyards in between. The W.L. Parks Middle School at 1090 Windsor Street is a 1966 concrete building in the New Formalist style [see photograph 56].

Schools:
Charles L. Gideons Elementary (1959), 897 Welch Street [See photograph 17]
W.L. Parks Middle School (1966), 1090 Windsor Street (non-contributing) [See photograph 56]
(Former) W. H. Crogman School (1922)—now apartments, 1093 West Avenue [See photograph 62]

Apartment Buildings (contributing):
Metropolitan Parkway: 1152 and 1158 were constructed in 1930 as Dixie Pines Apartments for white residents until the late 1950s [see photograph 43].

Salvation Army Complex:
The Salvation Army complex bound by Metropolitan Parkway, Arthur, Welch, and Fletcher Streets is a contributing group of buildings that is privately owned. The Atlanta Theological Seminary (now the Salvation Army College) was constructed in 1909 on the western edge of the neighborhood.

The Salvation Army began in 1865 when William Booth, a London minister, gave up the comfort of his pulpit and decided to take his message into the streets where it would reach the poor, homeless, hungry, and destitute.

The Salvation Army’s “Southern Training College” opened its doors February 1927, at 339 Luckie Street in Atlanta, Georgia. In 1938, the college relocated from its original home on Luckie Street to its current site in the Pittsburgh neighborhood at 1032 Stewart, now Metropolitan, Avenue. The property originally belonged to Josiah Sherman, who built on the site three years after the Civil War.

In 1909, the Atlanta Theological Seminary secured the Sherman property. Founded in 1901 by the Congregational Church (United Church of Christ), the seminary was the first theological institution in the South to admit women students. In 1929, the Atlanta Theological Seminary moved, becoming part of the Nashville Tennessee Institution. The Salvation Army was offered
the option to purchase the seminary’s land and facilities. These included what is now the Sherman House (no longer extant) and the Powell Administration Building (1909) [see photograph 40]. The “Powell Administration Building,” the oldest remaining structure on the Salvation Army site, is built in the Greek Revival style, with Flemish Bond, masonry exterior walls. Original beadboarding is visible along the interior stairwell wall and the granite block foundation (with extraction grooves in granite) is clearly visible in the basement.

In 1947, groundbreaking ceremonies were held for the first additional buildings that would be erected over the next half century. One year later, in 1948, the Arkwright Memorial Building [see photograph 39] was dedicated in honor of Preston S. Arkwright, chairman of the Salvation Army’s Atlanta Advisory Board for over 25 years.

Students at the Salvation Army Training College range in age from 18 to 45. Students must complete two years of study, regardless of prior education, training or qualifications. The core curriculum includes courses in Bible, homiletics, doctrine, ethics, evangelism, Church history, Christian education, psychology, counseling, social work, accounting, business management, communications, and physical education. According to the creed of the Salvation Army, “men and women wishing to become Salvation Army Officers must be Christians, believe they are called to full-time service, and be Salvation Army Soldiers (members) endorsed for officership.” Officers must “possess a sincere love and understanding of people and be willing to work in highly demanding situations upon graduation.” (Mrs. Erma Jean Lockett, a resident of the Pittsburgh Community since 1932, says that cadets from the college have always come out into the neighborhood after severe storms; they knock on doors, asking if anyone needs help.)

The Salvation Army complex is segregated from the Pittsburgh Community by a perimeter fence and guarded entrance that were constructed in the late 1990s. It is bounded by Arthur Street to the north, Welch Street to the east, Fletcher Street to the south and Metropolitan Parkway to the west. Plans are currently underway for a community outreach center to be built at a green space block area located to the northwest of the complex (Mary, Dewey, Arthur and Metropolitan).

There are a total of four Salvation Army Training Centers in the nation: Suffern, NY; Chicago, IL; Rancho Palos, CA; and Atlanta.¹

8. **Landscape characteristics of the district, including streetscapes; front, side, and rear yards; parks and squares; recreation grounds; fields, wooded areas, hedgerows, etc.; and the relationship of these landscape characteristics to the natural terrain and the pattern of land subdivision:**

In general, lots are small (often 30 feet by 100 feet). Houses are set close to the street, and have small front yards, with narrow side yards and a larger back yard. Most trees are in back yards. No hedgerows exist. There is vacant land along the railroad lines. Pittsburgh’s largest park, Pittman Park, is located here. The streets in Pittsburgh are a series of north/south and east/west grids.

**Parks:**

¹ Jacqueline Campbell, Director of the Southern Historical Center, personal interview by Chad Carlson, 21 February 2004; The Salvation Army International Headquarters (N.p., 2004); available at: [www.salvationarmy.org](http://www.salvationarmy.org); Internet; accessed 24 April 2004.
Garibaldi Street: 1114-1120, Southside Springfield Baptist Church “Senior Citizens Community” Memorial Park (at this time just an open, grassy area).
Windsor Street: 950-963, Pittman Park (open fields, basketball and tennis courts, swimming pool).

9. **Physical features of historic transportation routes—highways, streets, rail lines, street railways, etc.:**
   An 1864 map, prepared by the U.S. Army forces during the occupation of Atlanta, indicates several roads (not named on the map). One north-south road followed the route of present Humphries Street, veering slightly west and south close to the path of Metropolitan Parkway today. Another road took an east-west route virtually identical to that of University Avenue, while another was a precursor of modern of Delevan Street. One road ran northwest-southeast in the path that was later taken by the East Tennessee, Virginia and Georgia Railroad in 1883.

Northern portions of McDaniel, Ira, Windsor and Smith Streets are all visible on the 1871 Bird’s Eye Map of Atlanta. The 1892 Bird’s Eye Map of Atlanta depicts the railroad lines and shops on the eastern boundaries of the Pittsburgh neighborhood, as well as the streetcar line on McDaniel Street. [See attached copies of 1864 map, and 1871 and 1892 bird’s eye maps.]

10. **Archaeological potential, if known or reliably inferred:**
There are no known archeological resources within the Pittsburgh neighborhood; however, a professional archeological survey has never been implemented.

11. **Exceptions to the general rule and/or historic anomalies:**
None known.

12. **A description of representative noncontributing properties within the district:**
The Pittsburgh neighborhood retains a high level of historic integrity. Most of the houses and community buildings retain their historic character and contribute to the significance of the district. In some cases, alterations have been made to the houses, such as the application of non-historic materials (vinyl and aluminum siding), and the enclosure of historically open porches. However, these alterations have not obscured the historic form of the buildings.

In some cases, character-defining features have been lost and some buildings no longer convey their historic significance. There are numerous vacant lots throughout the neighborhood. Most of the non-contributing buildings are less than 50 years old. A few appear to be older than 50 years, but have had such a substantial replacement of materials, that the historic character of the building is compromised. Non-contributing buildings include commercial establishments, apartments, and single-family homes.

**Addresses of Non-Contributing Buildings:**

Arthur Street SW: 345, 360, 452, 482, 486, 531

Bender Street SW: 762, 764, 766, 768, 772, 798, 800, 802, 804

Beryl Street SW: 802, 805, 811-813

Booker Avenue SW: 1142 [See photograph 73], 1144, 1148, 1149, 1170, 1175

Boykin Street SW: 211
Coleman Street SW: 771, 821, 825, 827, 836, 858, 861, 864, 878, 883, 887, 897, 903, 906, 914, 916, 948, 988, 1010, 1011, 1015, 1045, 1074, 1082, 1135, 1155, 1161

Delevan Street SW: 369

Dewey Street SW: 968

Dunbar Street SW: 488, 508, 531

Roy Street SW: 298
13. Boundary Description

13a. The boundaries of the Pittsburgh neighborhood are University Avenue on the south, Metropolitan Parkway on the west, Shelton and Stephens Streets on the north, railroad lines on the east, and Interstate 75/85 on the southeast corner.

13b. Originally, the southeast boundary of the district extended further east along the railroad lines to a point where they crossed University Avenue; however, Interstate 75/85 cut off this corner of the neighborhood. Today that section is totally commercial/industrial and bears no resemblance to residential Pittsburgh. Beyond the northern (Shelton and Stephens Streets) and southern (University Avenue) boundaries, land use changes from residential to commercial. On the west, the adjoining neighborhood of Adair Park begins on the west side of Metropolitan Parkway.

SECTION 3

HISTORY

A. Summary of Historical Facts

1. Original owner(s) or developer(s) of the district, if applicable: N/A

2. Subsequent developers of the district, if applicable: N/A

3. In general, the original use(s) of properties in the district (give dates):
   From the time of its development after the 1883 completion of the East Tennessee, Virginia & Georgia Railroad shops [see photograph 93], the community has been residential in character, with small commercial properties and churches interspersed throughout the neighborhood. Today, the properties retain, for the most part, their original use.
The property at present-day 543 Rockwell Street [see photograph 11] was originally the South Atlanta Camp Company Prison in the 1890s. The current commercial building, constructed in 1945, is Winston's Grocery.

In 1928, the residence at 305 Roy Street became "The Carrie Steele-Pitts Orphanage". The orphanage remained there until 1965, when it moved to its current location on Fairburn Road. The W.L. Parks Middle School was built in 1966, occupying the entire block of Windsor Street between Fletcher and Roy Streets, encompassing the former orphanage site.

In 1961, Lowell Vaughn founded the "Pittsburgh Civic League". The group constructed the Pittsburgh Civic League Apartments [see photograph 5] in 1972 at 801 McDaniel Street to help alleviate the neighborhood’s housing problem. The 120-unit apartment complex of five buildings (with 2- and 3-bedroom units), and a laundry and maintenance building, was designed by N.W. Robinson and Associates. These apartments are unique in that they are believed to be the first apartments in the nation to be built by a neighborhood civic league.

4. In general, the subsequent use(s) of properties in the district (give dates): See 3 above.

5. In general, current use(s) of the properties: See 3 above.

6. Architects, engineers, builders, contractors, landscape architects, gardeners, and/or other artisans and craftsmen associated with the design of the development or historic resources within the district:

   A. Ten Eyck Brown designed the W. H. Crogman School (1922). He was a well-known Atlanta architect who also designed the City Hall and Sweet Auburn Curb Market.

   N.W. Robinson and Associates designed the Pittsburgh Civic League Apartments.

10. Date(s) of development and source(s) used to determine date: The community began to develop in 1883. Source is Franklin M. Garrett, Atlanta and Environs: A Chronicle of Its People and Events, Volume I.

11. Significant persons associated with the district; summary or brief account for their significance; dates of association with the district or a property or properties within the district:

   Carrie Steele Logan [see photograph 88] (1829-November 3, 1900), started life as a slave. She worked as a maid at the Atlanta Union Railroad Station in the 1880s. While working, she often came across children who had been abandoned at the station. She would take these abandoned children to an empty boxcar, leaving them to play there while she worked, and then take them to her home to care for them at night. To support the children, Ms. Steele wrote and published a short autobiography.

   Monies from the sale of her autobiography, the sale of her own home, and contributions from various benefactors, enabled her to purchase a three-story, brick house with four acres of land on East Fair Street (now Memorial Drive). Originally called "The Colored Orphanage of Atlanta," the renamed "Carrie Steele Orphan Home" was the first African American orphanage in the nation.

   In 1890, Ms. Steele married Josiah Logan, who assisted his wife with the running of the orphanage. After Carrie’s death in 1900, Mr. Logan continued to run the orphanage. After the
death of Mr. Logan on December 14, 1904, Clara Maxwell Pitts became the new executive director of the orphanage. She oversaw its move in 1928 to 305 Roy Street, at the corner of Windsor Street, in the southern part of Pittsburgh. The orphanage was renamed “The Carrie Steele-Pitts Home” to acknowledge Ms. Pitts’ efforts.

The home moved to its current location at 667 Fairburn Road in Atlanta (not in the Pittsburgh neighborhood) in 1965. Both Carrie Steele Logan and her husband, Josiah Logan, are buried in Atlanta’s Oakland Cemetery.

William Henry Crogman [see photograph 89] (1841-1924) was a professor of Greek and Latin Studies at Clark College (now Clark Atlanta University) and became the first black president of the College (1903-1910). He was associated with Booker T. Washington and Martin Luther King, Sr. Crogman was the author of numerous books and was active with the church and civil rights. Although Crogman never lived in the neighborhood, he lived on the nearby Clark University Campus. Pittsburgh’s main elementary school, W.H. Crogman [see photograph 62], was named for him. Constructed in 1922, the school was built with support from Mrs. Carrie Badger Pittman, Clark University, the Atlanta Board of Education, and the Freedom Aid Society.

Walter Leonard Parks (1882-November 19, 1938) was a Pittsburgh businessman. He built and operated an ice-cream store in the “Parks Building” (constructed in 1920), which is still standing at 842 McDaniel Street [see photograph 6]. He lived in the community at 502 Rockwell Street [see photograph 7]. His house, constructed in 1929, remains an occupied residence today. W.L. Parks Middle School [see photograph 56], serving the sixth through eighth grades, opened in 1966. It is located at the former site of the Carrie Steele-Pitts Home, at 1090 Windsor Street, between Fletcher and Roy Streets.

Charles Lewis Gideons (1905-1956) was a graduate of both Clark College and Atlanta University. He was a teacher, and later principal at Booker T. Washington High School, then became principal of David T. Howard High School. He also worked at Atlanta Life Insurance Company. From 1930 until his death, he lived at 579 Pulliam Street (not in the Pittsburgh community). C.L. Gideons Elementary School [see photograph 17], constructed in 1959 at 897 Welch Street, was named for him.

Carrie Badger Pittman (d. June 27, 1972) was a teacher at Pittsburgh Grammar School [see photograph 90] from 1903-1920. She later became principal at the school until it closed in 1922. She was principal of the W. H. Crogman School (built in 1922) until her retirement in 1940. Along with nine other African American women principals, she organized the Atlanta Teachers Union in 1939. Pittman Park, the 14.1-acre park on the east side of Pittsburgh, is named after her.

12. Significant events or activities associated with the district, if different from routine historical functions: None.

B. Name of the District

1. List all names by which the district is and has been known, and indicate the period of time known by each name. Since its earliest development (1883) the community has been known as “Pittsburgh.” The 1890 census labeled the area “Pittsburg Village,” and the Atlanta Journal referred to the neighborhood as “Pittsburg” on May 17, 1902 (the Pittsburg Riot article).
2. **Explain the origin or meaning of each name:**
The smoky, grimy railroad shop atmosphere, reminiscent of the Pennsylvania steel mills, caused locals to call the area "Pittsburgh," the name by which the community is still known.

**C. History of the District**

Land lots 86 and 87, which later became the Pittsburgh community, consisted of gently rolling hills and forests at the time Fulton County was created in 1853. An 1864 map drawn by U.S. Army troops during the occupation of Atlanta shows a large stream bisecting the region, running north-south through the area at approximately the location of the Pittsburgh Civic League Apartments. A road ran close to the path taken by modern-day Metropolitan Parkway—about .5 miles east of the Atlanta and West Point Railroad. Another road ran northwest to southeast in the same path as the future East Tennessee, Virginia & Georgia Railroad line. Several small farmhouses were scattered across the region. The Confederate outer line of defenses for the city of Atlanta ran east-west across the area at approximately the line of present-day Rockwell Street [see attached 1864 map].

The railroad development, which gave birth to the city of Atlanta in the 1830s, continued to foster new neighborhoods after the Civil War. In 1883, the East Tennessee, Virginia & Georgia Railroad completed construction of its extensive shops on the southwestern city boundary. A predominantly African American residential neighborhood developed to the west of the shops and tracks, populated primarily by general laborers for the railroad and domestic servants. The smoky, grimy railroad shop atmosphere, reminiscent of the Pennsylvania steel mills, caused locals to call the area "Pittsburgh," the name by which the community is still known. The 1892 Bird's Eye map shows some of the streets that would later extend into the Pittsburgh Community: Humphries, McDaniel (misnamed "McDonald"), Smith, Ira, and Windsor Streets [see attached map].

The railroad development, which gave birth to the city of Atlanta in the 1830s, continued to foster new neighborhoods after the Civil War. In 1883, the East Tennessee, Virginia & Georgia Railroad completed construction of its extensive shops on the southwestern city boundary. A predominantly African American residential neighborhood developed to the west of the shops and tracks, populated primarily by general laborers for the railroad and domestic servants. The smoky, grimy railroad shop atmosphere, reminiscent of the Pennsylvania steel mills, caused locals to call the area "Pittsburgh," the name by which the community is still known. The 1892 Bird's Eye map shows some of the streets that would later extend into the Pittsburgh Community: Humphries, McDaniel (misnamed "McDonald"), Smith, Ira, and Windsor Streets [see attached map].

Settlement along railroad tracks was common for African Americans in the post-Civil War period. Although some freed slaves remained in the areas where they had worked, many migrated to cities and towns. There, they were usually relegated to undesirable bottomland and valleys, or marginal land at the periphery of towns, such as along railroads. Such African American enclaves in the Atlanta region included Butler Street Bottoms, (below the ridge line of "white" Peachtree Street), Summerhill (on the site of the city dump), and Tanyard Bottom (later Techwood Flats, located near the city's largest tannery). Reynoldstown, an African American settlement similar to Pittsburgh, was established around the roundhouse and rail yard of the Central of Georgia Railroad in the 1870s.

The same year the East Tennessee shops were completed, Julia A. Boardman, a white female real estate speculator, acquired title to Land Lot 86, whose boundaries were Berckele Street to the north, Ira Street to the east, Rockwell Street to the south, and McDaniel Street to the west. She hired civil engineer C.H. Strong to survey the property, dividing it into ninety small lots, each with a frontage of 30 feet, and a depth of 100 feet. This development set the pattern of the grid design still evident in the

---

community today. By 1901, only fifteen of the lots had been sold, so the remaining 85 were turned over to the Atlanta Real Estate Corporation to be auctioned off, fetching an average price of $275. Attractive credit terms were offered, with a $10 down payment, and a $5 monthly payment.6

In 1890, a former slave and railroad station maid named Carrie Steele began an orphanage for children she found abandoned by the railroad tracks. The Carrie Steele Home for Orphans was the first African American orphanage in the nation. Although originally located on East Fair Street (now Memorial Drive), it moved to the corner of Roy and Windsor Streets within the Pittsburgh neighborhood in 1928.

The 1890 census listed “Pittsburg Village” (a part of Black Hall, Military District #530 in Fulton County) with a population of 684.

Steady employment and segregation throughout the late 1800s and into the 1900s led to the establishment of black-owned businesses, churches, and schools. Many residents owned their single-family dwellings. Home Sunday School classes and Bible-study groups evolved into neighborhood churches, chief of which were Ariel Bowen African Methodist Episcopal Church and First Iconium Baptist Church. (Today the community is home to 28 different churches.)

The decade of the 1890s saw the dawning of Jim Crow in Georgia. In 1892, the first segregation legislation was passed (segregation of streetcars), followed quickly by legislation segregating trains, railroad stations, hotels, and water fountains. The new laws heightened tension and hostility between the races, and violence sometimes broke out. In the Pittsburgh community, violence occurred on May 17, 1902. The “Pittsburg Riot” was started when a former prison inmate, Will Richardson—an African American, spotted his arresting officer, Samuel A. Kerlin—a white former Atlanta police officer, walking down McDaniel Street. Both men were residents of the neighborhood: Kerlin lived on McDaniel Street, while Richardson had a store/residence on Amy Street. Richardson threatened to kill Kerlin, and fired several shots from a shotgun. Kerlin was unarmed. After a chase through the streets, Richardson hid in a store on Amy (now Delevan) Street, and continued to fire at police and the growing crowd. The incident ended the next day with the death of three policemen, one other white man, and two black men (one of whom was Richardson). During the riot, the sheriff stopped a white mob from torching the entire neighborhood; however, a block of Amy Street, near the intersection of McDaniel Street, was completely burned.7

The first decade of the new century saw the largest population migration into the community. It was also a time of considerable development in the Pittsburgh area. Electric streetcar lines provided Pittsburgh residents with easy access to downtown Atlanta’s jobs and amenities. By 1902, the Atlanta Railway and Power Company had lines along McDaniel Street, Stewart Avenue (now Metropolitan Parkway), and University Avenue.8

Between 1900 and 1910, lower McDaniel Street emerged as the major commercial thoroughfare, although small businesses were located throughout the community. During the following two decades, more businesses sprang up, including grocery stores, cafes, taverns, beauty and barbershops, shoe repair, wood and coal yards, ambulance and mortuary services, ice cream parlors, and medical and dental offices. Many of these small businesses were owned and operated by African American

6 Raymond F. Gordon, Community Building in Atlanta: The Pittsburgh Residential Community, 1883-1930, M.A. Thesis (Atlanta: Department of Afro-American Studies, Atlanta University, 1977), 27.
8 Adair Park Historic District, National Register of Historic Places Documentation, p. 12, on file at the Historic Preservation Division of the Georgia Department of Natural Resources.
residents of the community, but a number of stores belonged to white Jewish merchants, most of whom maintained residences outside of Pittsburgh (see section below, "Jewish Merchants in Pittsburgh").

A growing school-age population led to the founding of the “Pittsburgh Grammar School” in 1904 by the congregation of Ariel Bowen Church. In the beginning, the school met on the first floor of their new church building, but it relocated several times. By 1909, the community was able to raise enough money to construct a new two-story building at the corner of Mary and Ira Streets. The Atlanta Board of Education contributed $75 toward its construction. The location, however, was not ideal, as “the uneven land adjacent to the Pittsburgh School, with its undesirable neighborhood of cow yards and pig sties...[is] not drained, and the soil is of such a nature as to make it impossible to keep the school building clean after the children have been out in the yards.”

In 1922, Clark College donated land for a new school at the corner of West Avenue and Fletcher Street. Carrie Badger Pittman (who was an Ariel Bowen church member and principal of the grammar school) was instrumental in securing the donation. The new brick school, designed in the Beaux Arts classical style by architect A. Ten Eyck Brown, was named for William Henry Crogman, professor and first black president of Clark College. Ms. Pittman served as principal from 1922 until 1940. During her tenure, the school became known as one of the best and most attractive schools for African American students in the city. In 1940, the second principal, Mrs. Hubert, extended the curriculum to include evening classes, both academic and vocational, for adults. Alberta Williams, mother of Dr. Martin Luther King, Jr., briefly taught at the Crogman School before her marriage to Michael Luther King in 1926.

Lot sales and housing construction continued in the Pittsburgh Community. Between 1901 and 1930, the Union Realty Corporation acquired Land Lot 87, which was subdivided into small lots that were platted out in the familiar grid-like design. This was a time of great pride for the neighborhood, as people kept their yards and homes in good condition. Most were single-family homes and were owned by the residents. It was during this period of growth and expansion that the Pittsburgh Community was annexed into the City of Atlanta (1910). The entire city was likewise growing, as the 1910 census showed Atlanta’s population as 154,839 (a 67% increase over 1900). In comparison, the state of Georgia had only a 17.7% population increase between 1900 and 1910. By 1930, Pittsburgh was 91% African American although Stewart Avenue (now Metropolitan Parkway) remained a whites-only street until the 1950s.

During this same time period, the railroad expanded the number of tracks and increased its right-of-way, encroaching on the eastern side of the community. Over half of the adults living in Pittsburgh worked for the railroad, mostly in blue-collar jobs.
The Great Depression brought decreasing home ownership in Pittsburgh. As jobs were lost and families moved, houses became abandoned and began to fall into disrepair. World War II was a time of uncertainty, and many of the young men of the neighborhood served in the military.

After World War II (WWII), Pittsburgh continued to thrive as a residential area for African American workers, attractive because of its access to public transportation and industrial areas to the north. By 1950, the community had approximately a dozen churches, the Crogman School, and nearly thirty businesses along McDaniel Street, all serving the community of 8906 residents. The businesses included grocers, cleaners, barber shops/beauty salons and a funeral home. Several events would soon contribute to the decline of the area.

Immediately after WWII, the city of Atlanta hired a consulting firm to devise a transportation plan that would improve access to its central business district (CBD). The result was the 1946 Lochner Report. This report proposed a network of expressways radiating outward from the CBD to all four quadrants of the city. An unexpressed goal of this plan was to further segregate black and white neighborhoods. Rather than minimize destruction of inner city and primarily black neighborhoods by utilizing the area to the west of the CBD which was increasingly vacant, the highway construction was configured to the east of the CBD. This allowed the expressway to serve as a buffer between the CBD and the remaining portions of these African American neighborhoods. The highway construction would eliminate portions of Auburn Avenue, Old Fourth Ward, Summerhill, Peoplestown, Mechanicsville, and Vine City. Although the destruction was not as severe, Pittsburgh was also affected. The construction destroyed approximately 30 houses along Fortress Street and a commercial area along Pryor Street in the southeastern corner of Pittsburgh.

In 1949, the city began urban renewal efforts that would impact Pittsburgh. The federal urban renewal program intended to replace deteriorating housing with improved housing and bring industrial jobs to the renewed area. There was a often a gap, however, in the period of time between destruction of deteriorating housing and the construction of replacement housing. Not until 1968 was enough funding made available to build all of the public housing authorized by the 1949 Housing Act. Many homes in the neighborhood were torn down or abandoned. Efforts to rebuild were slow. In addition, the area to the west surrounding the Atlanta University Center began to pull middle-class blacks from Pittsburgh and other African American neighborhoods. By 1956, access to the southwest side of the city for middle income blacks had led to the construction of 3,450 new owner-occupied houses and 3,100 private rental units. With fewer homes available in Pittsburgh and the draw of better housing elsewhere, the middle class and younger residents began their exodus.

Also after WWII, new classroom buildings, gymnasiums, and libraries were built across the state. This activity was due to federal assistance for the construction of educational facilities and Georgia’s consolidation of schools at the county level. A new auditorium and additional classroom space was added to the Crogman School in 1949. Charles L. Gideons Elementary School, named for a long time employee of the Atlanta School system, was built in 1959.

---

16 Note: Source for all of the population and housing units was taken from US Census Data, Census Tracts 57 & 63 which includes all of the Pittsburgh neighborhood including the Salvation Army complex.

20 Keating, 98

21 Corporation for Olympic Development in Atlanta, Atlanta Olympic Ring Neighborhood Survey: Pittsburgh Project Area Report. (Atlanta, GA, September 1993.)
By 1960, Pittsburgh’s population had grown to its peak of 9780 residents. Housing units reached a low of 1535, having lost over 600 housing units since 1950. The housing character of the neighborhood changed as a few apartments were built to accommodate lower income families. The neighborhood was also dotted with small, concrete block duplexes and single-family housing built by various urban renewal projects.

W.L. Parks Junior High School was built in 1966 to serve grades 7-9 in the community. It is located at 1090 Windsor Street, on the property once occupied by the Carrie Steele Orphanage. By 1970, the neighborhood still maintained a strong network of community churches while businesses serving the community declined slightly. The number of businesses peaked in 1960 and then began a gradual decline as the spending power of the community decreased.

During the 1960s, Atlanta emerged as an example of Sunbelt prosperity. Pittsburgh’s participation in this prosperity was limited. Adequate housing continued to be a problem in Pittsburgh and Atlanta’s city government was slow to respond. In an effort to uplift the community, Lowell Vaughn founded the Pittsburgh Civic League in 1961, and operated the organization out of his McDaniel Street barbershop. Civic leagues were usually formed in more rural areas to be sure that African Americans received the equal rights that the law now “guaranteed.”

In 1972, this organization built the Pittsburgh Civic League Apartments at 801 McDaniel Street to help alleviate the neighborhood’s housing problem. The 120-unit apartment complex included five buildings with two- and three-bedroom units, a laundry and maintenance building. The architect was N.W. Robinson and Associates. The estimated cost was $1,437,000. These apartments are unique in that they are believed to be the first apartments in the nation to be built by a neighborhood civic league. The Civic League was also responsible for other minor construction in this area in the 1970s. Permits for fencing, retaining walls and accessory buildings were found in the building permit files at the Atlanta History Center.

The Crogman School closed in 1979. The school building stood vacant until the Atlanta School Board sold the property for redevelopment in 1994. Neighborhood population declined to 7276 residents in 1970, 4324 in 1980, and 3567 in 1990. During this period, Pittsburgh had severe problems with drug-related crime. With the decline in population, construction in Pittsburgh since 1970 has been minimal. The 2000 U.S. Census showed the median construction date of buildings in the neighborhood to be 1939. In spite of the challenges, Pittsburgh has maintained the majority of its stock of residential buildings associated with the late 19th and early 20th century African American settlement, as well as scattered post-World War II affordable housing. The 2000 population was 3261, with a majority of residents (3144) African American. Currently, Pittsburgh has an active neighborhood association, the Pittsburgh Community Improvement Association (PCIA), which is working to revitalize the community.

Pittsburgh Place Name Data
Derivation of Street Names

22 Fulton County Schools website. Available online at http://www.fultonschools.org
24 Atlanta City Directories 1950, 1960, 1970,
28 Derivation of street names and street name changes are from Garrett, Environ, Vols. I and II; Garrett, Yesterday's
Humphries Street – Charnier Humphries was a pioneer Atlantan and proprietor of the White Hall Tavern, which he built in 1835. The tavern buildings were notable for their white exteriors — the only painted buildings in the region at that time.

Ira Street and McDaniel Street – Ira Oliver McDaniel (d. 1887) was a pioneer Atlantan, cotton merchant, and builder of the city’s first block of brick buildings (1847—preceded only by the railroad depot and the Atlanta Hotel). He was one of the founders of the city’s first daily newspaper, the *Atlanta Intelligencer* (1851); Atlanta city councilman (1850s); father of Georgia governor Henry D. McDaniel; and one of the incorporators of the Atlanta Bank (1852), the Georgia Western Railroad Company (1854), and the Georgia Airline Railroad Company (1856).

Sims Street – Walter Arthur Sims, mayor of Atlanta (1922).

Smith Street and Windsor Street – L. Windsor Smith, early resident and landowner in the Atlanta area. His house was located on the northwest side of Whitehall Street, opposite Hood Street’s intersection with Whitehall [see photograph 77]. (Hood Street is now Eugenia Street and the intersection with Whitehall was eliminated by the construction of Interstate 20.) General John Bell Hood, C.S.A., used the house as his headquarters until the surrender of the city on September 2, 1864. The house then served as headquarters for Col. Henry A. Barnum, 149th New York Volunteer Infantry, U.S.A. The house is visible on the 1871 Birdseye Map.

Stewart Avenue – Andrew P. Stewart, moved to Atlanta in 1865, and became owner of most of the land three miles southwest of Five Points during the latter part of the 1800s (called Capitol View).

**Street Name Changes**

Booker Street – changed from Stevens Street in 1924.

Delevan Street – originally Amy Street.

Coleman Street – originally Cunningham Street.

Metropolitan Parkway – originally Stewart Avenue.

Welch Street – originally Blackgum Street.

**Derivation of Place Names**

Pittman Park – named for Carrie Badger Pittman (see Section 3.A.11 above).

C. L. Gideons Elementary School – named for Charles Lewis Gideons (see Section 3.A.11 above).

W. L. Parks Middle School – named for Walter Leonard Parks (see Section 3.A.11 above).

**Jewish Merchants in Pittsburgh**

**Information from Atlanta City Directories, 1910-1959**

Metropolitan Parkway (Stewart Avenue) contained white residences and businesses on both east and west sides until the 1950s. By the late 1940s, Metropolitan contained more businesses, rooming houses and apartments but was still white only. The east side began to change to African American ownership in the late 1950s. All of the other Pittsburgh streets historically contained only African American residences. Grocery stores located in the neighborhood were the exception. In the 1915 City Directory, a small group of African American homes surround a black owned grocery store at the corner of Metropolitan (Stewart Avenue) and University. By 1920, this grocery was owned by Morris Garber, who maintained a grocery business in the area for 25 years. In 1930, Joseph Moreland operated another grocery store on Coleman Street. This store ultimately changed to an African American church in 1945. In 1920, Sidney Zimmerman operated a grocery on Rockwell Street. In the 1930s ownership of the store changed to Gus Silverman. Both Zimmerman and Silverman were white.

*Atlanta; Atlanta City Directories.*
and maintained residences outside of Pittsburgh. In the late 1920s, Max Berner operated a grocery store on Sims between Fletcher and Roy which he sold to Andrew North, an African American in 1945. None of the white store owners lived in Pittsburgh.

**Interview with Pittsburgh resident, Erma Jean Lockett, by Chad Carlson, April 19, 2004.**

Many of the grocery stores in Pittsburgh were owned by Jews. In the days before refrigeration, families often had to go to the grocery store everyday to pick up fresh food. Thus, these grocery stores were an important component of the lives of the residents of Pittsburgh in the early to mid 20th century.

E.J. Lockett, a citizen of Pittsburgh since the 1930s, recalls a store on McDaniel Street, across from the "PM" building, owned by "Jew" Garber. The Garbers lived in Pittsburgh, at the corner of University Avenue and Stewart Avenue (now Metropolitan Parkway), across from the present day location of "Mrs. Winners." Later, Mr. Garber's son, Sampson, owned a liquor store near University and Metropolitan. According to Ms. Lockett, the building was sold around the time of the Olympics, in 1996.

A Mr. Berger owned a grocery store at McDaniel and Roy Streets, where the Bethany Church Education Building now stands. The Burger family lived upstairs from the store. Mr. Shaffer owned a grocery store at McDaniel and Berkle. At McDaniel and Delevan, at the present location of the Iconium Church, was a grocery store owned by a Mr. Ike Andrews. According to Ms. Lockett, the store was in operation up until approximately 1971. Ms. Lockett recalls that because competition was fierce among grocery stores, "everybody [store owners] had an angle." For example, at one store you might "buy liver and get your onions for free."

**SECTION 4**

**SIGNIFICANCE**

**A. Areas of Significance**

- architecture
- community planning
- ethnic heritage (e.g. African American)
- social/humanitarian

**B. Statements of Significance**

The period of significance for Pittsburgh, a predominantly African American community, begins in 1883 with its initial grid development, and extends into the late 1940s, with the construction of units of urban renewal-type concrete-block public housing.

The Pittsburgh Community is significant in the area of architecture because its houses represent styles and types popular in Georgia from 1880-1970. Pittsburgh includes many examples of architectural styles and buildings that may be characterized by house type, floor plan and number of stories as defined in *Georgia’s Living Places: Historic Houses in Their Landscaped Settings*. These include: gabled-ell, side gabled, side hall, hall and parlor, Georgian cottage, American foursquare, central hallway, pyramidal, New South, single shotgun, and double shotgun as well as bungalows and ranch houses. The main architectural styles represented are Folk Victorian and Craftsman. Folk Victorian, which is characterized by spindle-work, and jigsaw-cut trim, proliferated in the mid-to-late 19th century, as industrialization and the growth of railroads meant that decorative architectural trim could
be mass produced and sent to all parts of the country. Craftsman style houses, featuring brackets under the eaves, porches with square columns, and low pitched roofs, were built across the state of Georgia, in both rural and urban settings, from the 1910s through the 1930s. Gabled-ell houses, with their characteristic projecting gable-front and side wing, are common in Pittsburgh, as are pyramidal cottages, with the customary hipped roof. These two house types are most often in the Folk Victorian style.

Numerous shotgun houses, both single and double, were built in the area. Shotgun houses are one-room wide and two or three rooms deep, with a front porch that provides outdoor living space. Stylistically, many shotguns are either plain, or feature Folk Victorian ornament, especially on the porch or the front gable end. Shotgun houses are often grouped together, forming unbroken rows along the street. For example, at 1181-1189 McDaniel Street, there are five double shotguns in a row. They are joined together in the back, forming a continuous row of housing.

The shotgun house is an African building tradition that entered the American Southeast via the trans-Atlantic slave trade through the Caribbean Islands. Migrating African American freedman bought the style to Southern towns and cities. The name "shotgun" (locally explained as deriving from the possibility of shooting a shotgun through the house without hitting anything) may have derived from the African word "to-gun", which means in the Fen language of Benin, "place of assembly." These black cultural associations had become totally obscured by the turn of the 20th century as more and more of these structures were built throughout the South as low income housing for both blacks and whites.

The Powell Administration Building [see photograph 40], the oldest (1909) structure on the Salvation Army complex site, is built in the Greek Revival style, with Flemish bond masonry exterior walls. Original bead boarding is visible along interior the stairwell wall, and the granite block foundation (with extraction grooves in the granite) is clearly visible in the basement.

Few buildings were constructed in Pittsburgh after World War II (for the most part, the community was already developed by the beginning of the war). Included among the few post-war buildings is the Bethany Education Building at 1113 McDaniel Street [see photograph 53]. Its flat roof and a band of windows across the second floor are characteristic of the International Style, notable for its lack of both ornament and references to past architectural styles. The International Style was a post-World War II phenomenon; this is especially true for the Southern states, such as Georgia, whose community landmark buildings remained devoted to classicism well into the 1950s.

The Pittsburgh neighborhood includes numerous historic commercial buildings. Several two-story brick and concrete commercial buildings are located along McDaniel Street, e.g., the (Walter Leonard) Parks Building at 842 McDaniel Street [see photograph 6]. Constructed in 1920, the building originally housed an ice cream and confectionary shop.

Pittsburgh has numerous concrete-block houses (circa 1949) that reflect the effects of urban renewal efforts in the community after World War II. Examples of these houses styles can be found at the 1000 block of Garibaldi Street, the 1000-1100 blocks of Windsor Street, and the 200-300 blocks of Delevan Street.

30 "What do you know about shotgun houses?" Webpage from Southern Roots (Jacksonville, FL: Blacksonville.com, 2002); available http://www.blacksonville.com/shotgunhouse.htm; Internet.
The Pittsburgh neighborhood retains a high level of historic integrity. Most of the houses and community buildings retain their historic character and contribute to the significance of the area. In some cases, alterations have been made to the houses, such as the application of non-historic materials, (vinyl and aluminum siding) and the enclosure of historically open porches. However, these alterations have not obscured the historic form of the buildings.

Historic Pittsburgh is significant in the area of **community planning and development** because its plan reflects its growth as a settlement around an important railroad line (in 1883, the East Tennessee, Virginia & Georgia Railroad completed construction of its extensive shops on the southwestern city boundary). African Americans seeking jobs with the railroad settled on the west side of the tracks. Future development in Pittsburgh would radiate, primarily, south and west of this initial settlement.

Neighborhood streets in Pittsburgh are laid out in a grid pattern, with minor shifts to accommodate terrain. Like other Atlanta neighborhoods, such as nearby Adair Park and Candler Park, Pittsburgh was formed by developers purchasing and developing small tracts of land. Collectively, these tracts resulted in larger neighborhoods whose boundaries were defined by major roadways.

Development of Pittsburgh began in 1883, when Julia Boardman acquired title to the area west of the railroad tracks. This property, land lot 86, was bounded to the north by Berckele Street, to the south by Rockwell Street, to the west by McDaniel Street, and to the east by Ira Street. The area was surveyed into 90 lots, having a frontage of 30 feet and a depth of 100 feet, and oriented in a grid pattern.31

Pittsburgh is significant in the area of African American **ethnic heritage**. Since its initial development in the 1880s west of the East Tennessee, Virginia & Georgia Railroad shops, Pittsburgh has been a predominantly African American community. At the end of the 19th century, African Americans typically moved to the city’s outskirts with the lure of jobs at the confluence of railroad lines. African Americans moved to areas with railroad activity because the railroads offered job opportunities not available elsewhere in the city.

Although white residents lived in Pittsburgh at the turn of the 20th century, the 1902 “Pittsburg Riot” as well as Atlanta’s 1906 race riot were major factors in increased segregation in Pittsburgh, as well as in the rest of city.32 In the two decades after the race riots, white Atlantans made efforts to legally prevent blacks from moving into white neighborhoods by means of citywide comprehensive zoning policies.

Nationally, government mortgage policies also perpetuated racial segregation. Integrated neighborhoods were declared poor risks and thus, ineligible for loan assistance. Both FHA and VA loans invested in new buildings in the suburbs. These suburbs started out white and remained white for decades, resulting in the stasis of black enclaves in and around Atlanta.

Pittsburgh is significant in the **social/humanitarian** area. The Salvation Army’s “Southern Training College,” located at 1032 Metropolitan Parkway, is one of only four training colleges in the country (the others are in Suffern, NY; Chicago, IL; Rancho Palos, CA). The college has been located in the Pittsburgh neighborhood since 1938.

Upon completion of their training at the college, graduates are assigned to help and minister among the poorest and most needy members of society. Some serve as corps officers (pastors and corps community center administrators) and others work in Salvation Army rehabilitation centers for

recovering drug and alcohol addicts. Based on Christian precepts, the Salvation Army shows "practical concern and care for the needs of people regardless of race, creed, status, color, sex or age."33

C. Exceptions. None.

SECTION 5

SUPPORTING DOCUMENTATION

A. Sources of Information

The following is a checklist of sources that should be consulted to adequately research historic properties. INCLUDE A COMPLETE BIBLIOGRAPHY OF CONSULTED SOURCES. It is not necessary to provide a copy of all material consulted; however, it would be helpful if clear photocopies could be submitted for those entries marked by an asterisk (*). Do not send originals—these are non-returnable. Put a check by all the sources consulted. Put n/a beside the sources that were not available.

* Architectural Plans (cite the date, title or legend, and location):

Biographical Sketches (published in books or an obituary from the newspaper): See bibliography.

Census Records (Indicate the years of census records consulted): 1880-2000.

Agricultural:
Manufacturing:

City and/or Telephone Directories: See bibliography.

City Records at City Hall

Building Permits: Accessed at the Atlanta History Center.
City Council Minutes:

County Historian (unpublished works, interviews):

County Histories/City Histories: See bibliography.

County Records at County Courthouse or on microfilm at the Georgia Department of Archives and History

Deeds:
Estate Records:
Tax Digests: See bibliography.

Gazetteers:

---

Insurance Records: See bibliography.

Interviews (who, when, where, by whom): See bibliography.

Newspapers (especially centennial or anniversary editions)—send photocopies and include date.
NOTE: send photocopies of obituaries for people associated with the property: See attached.

* Historic Photographs and Postcards—send photocopies and include date and location of the original. See bibliography.

Personal/Family Papers (letters, diaries, recollections, business papers, and stationary): See bibliography.

Periodicals/Magazines (professional business, popular): See bibliography.

Place Name Data (explain the origins of any place names associated with property): See section (above) on derivation of place names.

Tax Digests: See bibliography.

Internet sources: See bibliography.

I have enclosed the above documentation with my Historic District Information Form/National Register form for the Pittsburgh Historic District proposed nomination. I understand that if I do not include all of the requested documentation, my application will not be processed until it is complete.

Signature of Preparer ___________________________________________ Date ____________________
23 April 2004

Richard Laub
Historic Preservation Department
Georgia State University
819 General Classroom Building
38 Peachtree Center Ave.
Atlanta, GA 30303

Mr. Laub,

This letter comes to strongly support the application supporting Pittsburgh’s designation as a national historic site. Please forward to the appropriate reviewers.

Founded in 1883, Pittsburgh has the distinction of being one of the oldest continuously African-American Communities in the city of Atlanta. Pittsburgh is home to our most noted historic resource, the former Crogman School Elementary School (1820’s). We are fortunate that many Crogman alums are still alive today and living in the community.

Currently, the Pittsburgh Community Improvement Association (PCIA) has been charged with redeveloping this once vibrant neighborhood. As we engage in vital redevelopment activities related to new housing and economic development, we will continue to pay attention to the rich historic resources now present in the community. We are grateful that Pittsburgh still exists as an “intact” community—one that is worthy of the historic site designation. Similarly, we are especially indebted to the students at Georgia State University who have spent tireless hours documenting Pittsburgh’s historic resources.

Thank you for considering our application. We look forward to receiving a favorable and expedient judgment as you make a final evaluation of our request.

Uplifting Pittsburgh,

Ronnie Galvin

"Pittsburg" Riot, Front page of Atlanta Journal, May 17, 1902
Trouble Between Negro Desperadoes and Officers Results in One of the Greatest Tragedies Atlanta Has Ever Known. Ring Leader of the Negroes Is Cremated in House Where He Took Refuge. He Slew Four Policemen.

In an effort to dislodge Will Richardson, a negro desperado, from his store in Pittsburg, a suburb between the city and Fort McPherson, in which he had taken refuge after assaulting and nearly killing Ex-Policeman S. A. Kerlin, three policemen and one citizen met instant death this morning. Two negroes have been killed, while two white men and one negro are probably fatally wounded.

Richardson, with several other negroes, attacked Kerlin last night near his home, in Pittsburg, and beat him nearly to death. Richardson fired five shots at him, but none of them took effect. The matter was reported to the county police and they found Richardson in a store at the corner of McDaniel and Amy streets. They called on Richardson to come out and surrender. He fired on them, seriously wounding Owen Heard, a member of the posse. The officers drew off a little, waiting for daylight to rush the building. When morning came, the officers made another effort to capture the negro, and in a few moments four persons had been shot down by Richardson, who was pumping lead from a Winchester with the accuracy of a sharpshooter. Henry King, who was with Richardson when he shot Owen Heard, came out, and was forced by the officers at the point of a revolver, to crawl to the building and fire it.

The house was burned, and Richardson's dead body, charred beyond recognition, was found.

The crowd which surrounded the house was immense, and the negro, firing with the deadly accuracy of a sharpshooter, was picking off officers as fast as they showed their heads.

STORY OF TRAGEDY

With full details.

Four white men and three negroes dead, three white men wounded, and entire block of buildings burned is the result of the resistance of the officers of Atlanta and Fulton county houses, the barns and the bushes made such admirable shelter that it was possible to run from house to house and dodge between fences without being detected.

That the negro knew this well is evidenced by the number of the dead and wounded among those who were attempting to capture the desperado.

Few Officers at First.
ED BATTLE, A CITIZEN.
H. G. OZBORN, A POLICEMAN OF FULTON COUNTY.
THOMAS GRANT, A CITY POLICEMAN.
EDWARD CRABTREE, A CITY POLICEMAN.
WILL RICHARDSON, THE NEGRO DESPERADO, WHO KILLED THE MEN AND WHO AFTERWARDS HIMSELF MET DEATH.
JAMES HARRISON, A NEGRO WHO ATTEMPTED TO ESCAPE FROM HIS HIDING PLACE.

The wounded are:
Call Officer G. H. Spradlin, shot in the arm.
W. A. Wright, a county policeman, who was struck in his left shoulder.
E. T. Jackson, a street car man, struck by a bullet in his right hip.
George Heard, a county policeman, struck by a bullet in his right arm.

SHEPARD FINZED, A NEGRO WHO ATTEMPTED TO ESCAPE FROM HIS HIDING PLACE WITH JAMES HARRISON.

It was in a veritable arsenal, which he operated as a store, that the negro, Will Richardson, made his stubborn resistance and afterwards went to his death. At 9:30 o'clock this morning, twelve hours to the minute after he became a fugitive from justice, the white bones and the grinning skull of the negro were discovered amid the ruins of his store.

A cheer went up and the crowd surged dangerously close to the fierce heat of the burning ruins to have a look at the bones of the man who had proven so dangerous a marksman and so desperate a character.

The fight between the officers and the negroes occurred in the vicinity of the corner of McDaniel and Amy streets, and it was within 200 yards of that corner that all the men were killed.

It is in the heart of Pittsburg, which is the name of the settlement that lies directly south of the city limits on McDaniel street. It is thickly settled with small houses. There are outbuildings and barns and bushes over the entire neighborhood. No better place for the fight could have been selected by Richardson had he been planning for such a fight for years. The few officers at first.

During the early morning hours it was supposed that the negro was merely attempting to escape, and therefore the officers at the place were few in numbers, but when it became evident that it was his determination to kill as many of the officers as possible before dying himself and to resist arrest even to the death of the city officials became active. Wagon loads of policemen with winchesters were hurried to the scene of action and the sporadic firing of the early morning gave place after daylight to a heavy fusillade from a hundred or more rifles which poured a rain of lead into the store, barn and dwelling whenever those who were watching believed they had discovered a chance to kill the desperado.

The shooting ended with the 500 or more shots that were poured into the body of Milton Risby, the negro who was shot into bits as he lay on the ground in a hog pen. Then came the speech of the sheriff addressing calmness on the part of the crowd and the efforts of the officers thereafter were directed towards controlling the temper of the white men who were walking the streets of Pittsburg with guns upon their shoulders and pistols in their hands.

Woman Owned the Store.

The store at the corner of McDaniel and Amy streets was owned by Anna Wilburn, a negro woman, who lived directly in its rear at the corner of Amy and Smith streets. Between the store and the houses stood a barn and a wood yard. The store was operated really by the Wilburn woman, but Will Richardson appears to have had considerable to do with it and worked there. Some of the negroes in the neighborhood declare that it was his store.

The dwelling, barn, wood yard and store were all burned to the ground, and their contents were a total loss. The store was a veritable arsenal. After the fire reached the vital portions of the store there was a continuous popping sound as the cartridges exploded, while several times there were loud explosions and upheavals of burning embers, supposed to have been caused by the firing of kegs of powder.

The worst battle that the officers of Fulton county have ever had with criminals in this section began last night about 9:30 o'clock with an attack upon Policeman S. A. Kerlin, who resides at 522 McDaniel street. He was set upon by five negroes who announced that they would kill him and after beating him to the ground made threats of shooting him as he lay there.

Kerlin yelled "murder" and called for help. County Policeman George Heard answered the cries of Kerlin, and went to his assistance. He was soon joined by Ed Battle, one of the killed.

The negroes ran when they saw help coming, but shot at the officers, striking County Policeman Heard in his right arm.

2 Tax map number
1886 map:
Pittsburgh not shown on map yet
Furthest south-west street corner is Fulton and S. Pryor

1896 map:
most of Pittsburgh shown
Humphries (westernmost street), Windsor (easternmost street), Gardner (southernmost street), railroad (northern boundary)
Upper two-thirds of neighborhood shown inside the city limits

1911 map:
Much more residential development by this time.
Full neighborhood shown
Gardner St. becomes “Hope”
Nilson St. becomes “Welch”
Current Coleman St. was then called “Elizabeth”
Theological Seminary is on map (current Salvation Army)
Most commercial properties were along McDaniel, but some on Fletcher, Arthur, and Roy
Major industrial areas along northern railroad lines
churches scattered, one on Arthur (ariel bowen), one on mcdaniel (Iconium Baptist)

1930-50 map:
churches (all colored): Fortress Baptist (fortress st)
“baptist church” (fletcher)
ariel bowen (Arthur and smith)
“Baptist church” (garibaldi and amy)
“Baptist church” (garibaldi)
Sunnyside Baptist (sims and amy)
Iconium Baptist (mcdaniel)
Betv?? Baptist (roy and mcdaniel)
“church” (roy and smith)
New Hope Baptist (coleman)
Church of God (gardner and smith)

Community properties: Crogman school
Carrie Steele Orphanage (next to Crogman school, on Windsor and roy)
Carrie B. Pittman Park (with swimming pool and gym, built in 1950)

Salvation Army training property

Most commercial development still on McDaniel, but still some scattered on Rockwell, Fletcher, and Stewart.

Auto repair and filling stations:
- 1 - University and Moton
- 1 - IRA
- 1 - Stewart
- 1 - Mary and Stewart

Industrial properties mostly along railroad to the east and north:

Examples:
- Motor freight station
- Chemical manufacturing
