The Georgia Health Policy Center’s (GHPC) core competencies include knowledge creation, management, and transfer; neutral convening and facilitation; strategic planning; policy analysis; evaluation; grants management; and systems thinking. Throughout our 20-year history, these competencies are consistently reflected in our work. Four particular projects involving the center that have incorporated these competencies and directly impacted the lives of Georgia citizens include Medicaid Reform, Medicaid Transformation, PeachCare for Kids, and the Medicaid Business and Policy Team.

Medicaid Reform

In 1996, Governor Zell Miller asked the Georgia Coalition for Health and the Georgia Health Policy Center to help the State determine how to make long-term changes in the Medicaid system to achieve greater stability and budget predictability. Working with an inter-disciplinary research team of twenty-five (25) nationally recognized health care experts, the GHPC undertook a multi-faceted approach for studying the Medicaid program. This approach included:

• Development of a six-year economic and demographic forecast for Georgia;
• Review and analysis of current Medicaid reform efforts both in Georgia and nationally;
• Public involvement process to obtain input from more than 1,200 citizens, Medicaid consumers, and providers;
• Analysis of the existing and planned health care markets;
• Analytic assessment of the future impact of Medicaid changes on the various components of these markets; and
• Development of economic actuarial models.

The work resulted in recommendations that led to state action in the areas of physical health, long-term care, children’s health, and the rural health care safety net.

Medicaid Transformation

In 2005, Governor Purdue commissioned the Medicaid Modernization Initiative. This effort was intended to supply the research base and stakeholder participation to support a waiver that would allow Georgia to be a lead state to find an optimal balance between fiscal and programmatic constraints and the diverse needs of the state’s population.

GHPC managed a statewide project that included working with the Governor’s Office, key legislators, and more than 260 Medicaid stakeholders, including recipients, providers, advocacy groups and the business community, to inform Medicaid reform and improve the health of Georgians. The work included a whole-scale change process meeting with almost 300 attendees, data analyses and modeling, structured listening sessions around Georgia to inform the process, and the integration of the work of five subcommittees (long-term care, services, outcomes, finance, and eligibility).
PeachCare for Kids®

In 1998, as a direct result of the concern for children’s health that was expressed during the Medicaid Reform project, the GHPC applied for and was awarded a grant on behalf of the state to replicate the Florida Healthy Kids program, a voluntary health insurance program using schools as a grouping mechanism for providing subsidized insurance to children. Since the GHPC had begun the groundwork for providing coverage to uninsured children, the Governor asked the center to assist in planning, developing and implementing Georgia’s Children’s Health Insurance Program, PeachCare for Kids, when the Children’s Health Insurance law was enacted by Congress.

Work included assistance with premium design, eligibility determination, claims processing, program administration, logo selection, outreach and marketing. Because of our expertise and knowledge, the GHPC continues to serve as the outside evaluator for PeachCare for Kids. The evaluation assesses the program’s effectiveness in achieving several goals: improved access to insurance, improved access to primary care, access to high quality health services, and better health outcomes.

Medicaid Policy and Business Team

The Georgia Health Policy Center’s Medicaid Policy and Business Team provides policy expertise and guidance to develop and implement policy changes, program improvements and business solutions for the Georgia Medicaid and PeachCare for Kids programs.

The Medicaid Policy and Business Team performs both quantitative and qualitative analyses as requested by the Georgia Department of Community Health (DCH), including but not limited to policy reviews, compliance assessments, claims-based research, state and federal policy scans, and stakeholder interviews. In addition, the Medicaid Policy and Business Team assists DCH with implementation of new or revised policies.

GHPC Faculty and Staff Expertise

Karen Minyard, PhD
Karen Minyard, Ph.D. has directed the Georgia Health Policy Center (GHPC) at Georgia State University’s Andrew Young School of Policy Studies since 2001. Minyard connects the research, policy, and programmatic work of the center across issue areas including, public health, end of life care, children’s health, public and private health coverage, and the uninsured. She has extensive experience with the state Medicaid program, both with the design of a reformed Medicaid program and the external evaluation of the primary care case management program. Minyard has 13 years of experience in nursing and hospital administration.

Dr. Custer is an expert in the areas of employee benefits, health care financing and health insurance. Prior to joining Georgia State University, he ran his own research firm in Washington, D.C. Custer also has been the director of research at the Employee Benefit Research Institute (EBRI) in D.C., as well as serving as an economist in the Center for Health Policy Research at the American Medical Association. He authored numerous articles and studies on the health care delivery system, insurance, retirement income security, and employee benefits. Custer is the Director of the Center for Health Services Research and holds a joint appointment in the Department of Risk Management and Insurance.

McLaren Haberlen, JD, MPH
Melissa Haberlen is an attorney and research associate at the GHPC. She has experience in health policy research, health law analysis and advisement, employer group health management, health benefits contract procurement and negotiation, human rights law, and project management. Melissa is an active member of the State Bar of Georgia, Health Law Section and Academy Health. She earned her Juris Doctor and Master of Public Health from Georgia State University, and her Bachelor of Science in International Affairs from the Georgia Institute of Technology.

Dr. Custer is an expert in the areas of employee benefits, health care financing and health insurance. Prior to joining Georgia State University, he ran his own research firm in Washington, D.C. Carla Willis, PhD

Carla Willis is the interim associate project director of the Medicaid policy team at the GHPC. She leads projects requiring quantitative and qualitative analysis, health policy development, legislative evaluation, and business solutions for the Georgia Medicaid and PeachCare for Kids® programs. Before joining the GHPC, Carla worked for the Atlanta branch of the Government Accountability Office (GAO) as a health policy analyst researching and evaluating a variety of public health programs and health care delivery issues. She also completed a one year fellowship as a population health fellow at the CDC.

Mei Zhou, MS, MA

Mei Zhou is a senior research associate at the GHPC. She has experience with large data sets, especially Medicaid eligibility and claims analysis. She has worked on many research projects including analyzing the costs and outcomes of Georgia Medicaid’s nursing facility program and home- and community-based services programs, the Member and Provider Satisfaction Surveys and the CAHPS surveys for Georgia Medicaid and PeachCare for Kids Programs, and an evaluation of Georgia’s disease management programs for aged, blind, and disabled Medicaid consumers for APS Healthcare and United HealthCare.
