Introduction

The Department of Human Resources (DHR) Georgia Oral Health Prevention Program (GOHPP) is located within the Division of Public Health. The mission of the GOHPP is to prevent dental disease for Georgia's children through education, prevention, and early treatment. By using portable dental equipment (1-2 in each health district) or mobile dental trailers and vans (FY2006: 11 trailers in 10 health districts and 2 vans in Fulton) to provide school based prevention services on a regional basis, Public Health (PH) strives to be more efficient and effective in reaching low and middle-income children statewide and throughout each district/region.

The Georgia Health Policy Center (GHPC) was established in 1995 as a nonpartisan forum for consensus building among diverse interest groups. The Health Policy Center's fundamental mission is to improve the health status of all Georgians through research, policy development, and program design and evaluation. Strategically located in the Andrew Young School of Policy Studies at Georgia State University, Center staff collaborates with university faculty and representatives of numerous organizations to assist in formulating policy at the state and national levels on health care quality, access, and cost.

The GHPC has produced many Child Policy Briefs that address oral health and access to care for children. In May 2001, the Georgia Department of Human Resources contracted with the GHPC to produce the qualitative and quantitative report, *Kids and Dental Providers in Georgia: The Gap between Supply and Demand*^{1,2}. The August 2002 *Evaluation of the Georgia Oral Health Prevention Program* provided further documentation of oral health prevention activities in each of the public health districts and an assessment of local level oral health program needs. Through subsequent DHR contracts, the quantitative portion of the evaluation report was updated with calendar years 2001, 2002, 2003, and 2004 Medicaid data analysis and Public Health information.

This current report produces the latest update available with calendar year (CY) 2005/state fiscal year (SFY) 2006 Medicaid claims data analysis of services provided to Medicaid and PeachCare enrolled children under age 19. Retrospective analyses of service trends and patterns from CY2000/SFY2001 through CY2005/SFY2006 are provided to document progress made in providing oral health access to care for low and middle-income children, and to illustrate continuing challenges. The presented results provide useful information to state and local oral health providers and advocates for program planning and decision-making.

¹ Available at <http://www2.gsu.edu/~wwwghp/cpipublications.htm>

² A policy brief based on the full report is available at <http://www2.gsu.edu/~wwwghp/publications/children/childpolbrf/cpbdenalhealth0101.pdf>

Methodology

The tables and figures produced for this report are based on analyses of calendar year 2005 Medicaid claims data by Georgia Health Policy Center (GHPC) staff with additional tables provided by the Department of Human Resources (DHR), Division of Public Health (DPH), Family Health Branch (FHB), Oral Health Section (OHS). Retrospective analyses of service trends and patterns CY2000/SFY2001 through CY2005/SFY2006 from previous reports are provided to document progress made in providing oral health access to care for low and middle-income children and to illustrate continuing challenges.

Figures 1 through 10, 13 through 15, and Maps 2 through 7 were produced by the Georgia Health Policy Center from CY2005 Medicaid claims data analyses. Information on eligibility for the Free and Reduced Lunch Program for Figures 11 and 12 were provided by the Georgia Department of Education, Office of Policy and External Affairs, Data Collection and Reporting Unit.

Figure 17 and Map 8 were produced by the GHPC with information provided by the DHR, DPH, FHB, Oral Health Section and the Georgia Board of Dentistry. Figures 16 and 18, and Map 1 were produced by the DHR, DPH, FHB, Oral Health Section and the Office of Health Information and Policy, respectively.

For Figures 1, 4, 8 and 10, county and district level PeachCare and Medicaid child counts were queried directly from the 2005 Medicaid claims data. The statewide total is a separate query directly from the claims data and takes into account the fact that children move among health districts. The “all programs total” is a separate query directly from the claims data and takes into account that children may move between Medicaid and PeachCare programs due to changes in parents’ income status.

For Figure 13, county and district counts of Medicaid and PeachCare enrolled dental providers are not intended to total to the statewide count. Dentist counts were queried directly from the 2005 Medicaid provider file. The statewide count takes into account that dentists may practice in more than one health district. Dentists practicing in more than one district are counted only once in the statewide total.

Growth rates measuring increases in Medicaid and PeachCare enrollments are calculated using 2000 as the base year. The average annual growth is derived by dividing the total rate of growth for the five year period by five, and converting to a percentage.

Rounded numbers are used throughout the report for consistency and to highlight key data information.

Preface: How to Use the Data

Funding for this publication is provided through the Georgia Department of Human Resources (DHR), Division of Public Health (DPH), Family Health Branch (FHB), Oral Health Section (OHS) and a Health and Human Resources (HRSA) grant; States Oral Health Collaborative Systems (Georgia Access to Dental Services/GADS III, federal fiscal years (FFY) funding for 2006 and 2007).

Retrospective analyses of service trends and patterns from CY2000/SFY2001 through CY2005/SFY2006 are provided to document progress made in providing oral health access to care for low and middle-income children and to illustrate continuing challenges.

This publication is a collaborative and contracted project between Georgia State University's Georgia Health Policy Center (GHPC) and the DHR Oral Health Section. The data provided are a measurement of Medicaid and PeachCare dental claims submitted by dental providers statewide, documenting prevention and treatment services provided to Medicaid and PeachCare enrolled children ages 0 through 18 years old. These public health service data provide an assessment of access to oral health/dental care through publicly funded insurance programs.

Data and analyses of service and population growth trends provided in this publication are intended for use by public policy leaders and decision makers, the professional and academic dental community, and collaborative partners and advocates. This dental service information provides support for building and strengthening public oral health program infrastructure, increasing dental treatment service availability and supporting community collaborations that increase access to care for underserved populations in Georgia.

Executive Summary

Detailed tables outlining calendar year (CY) 2005 and CY2000 through CY2005 Medicaid/PeachCare service utilization (6 full service years) are contained in the pages that follow. A summary of notable statewide observations is presented below. This information is provided to assist public program planning, statewide infrastructure building, and to support community collaborations that increase access to care. All years indicated are calendar years unless otherwise noted.

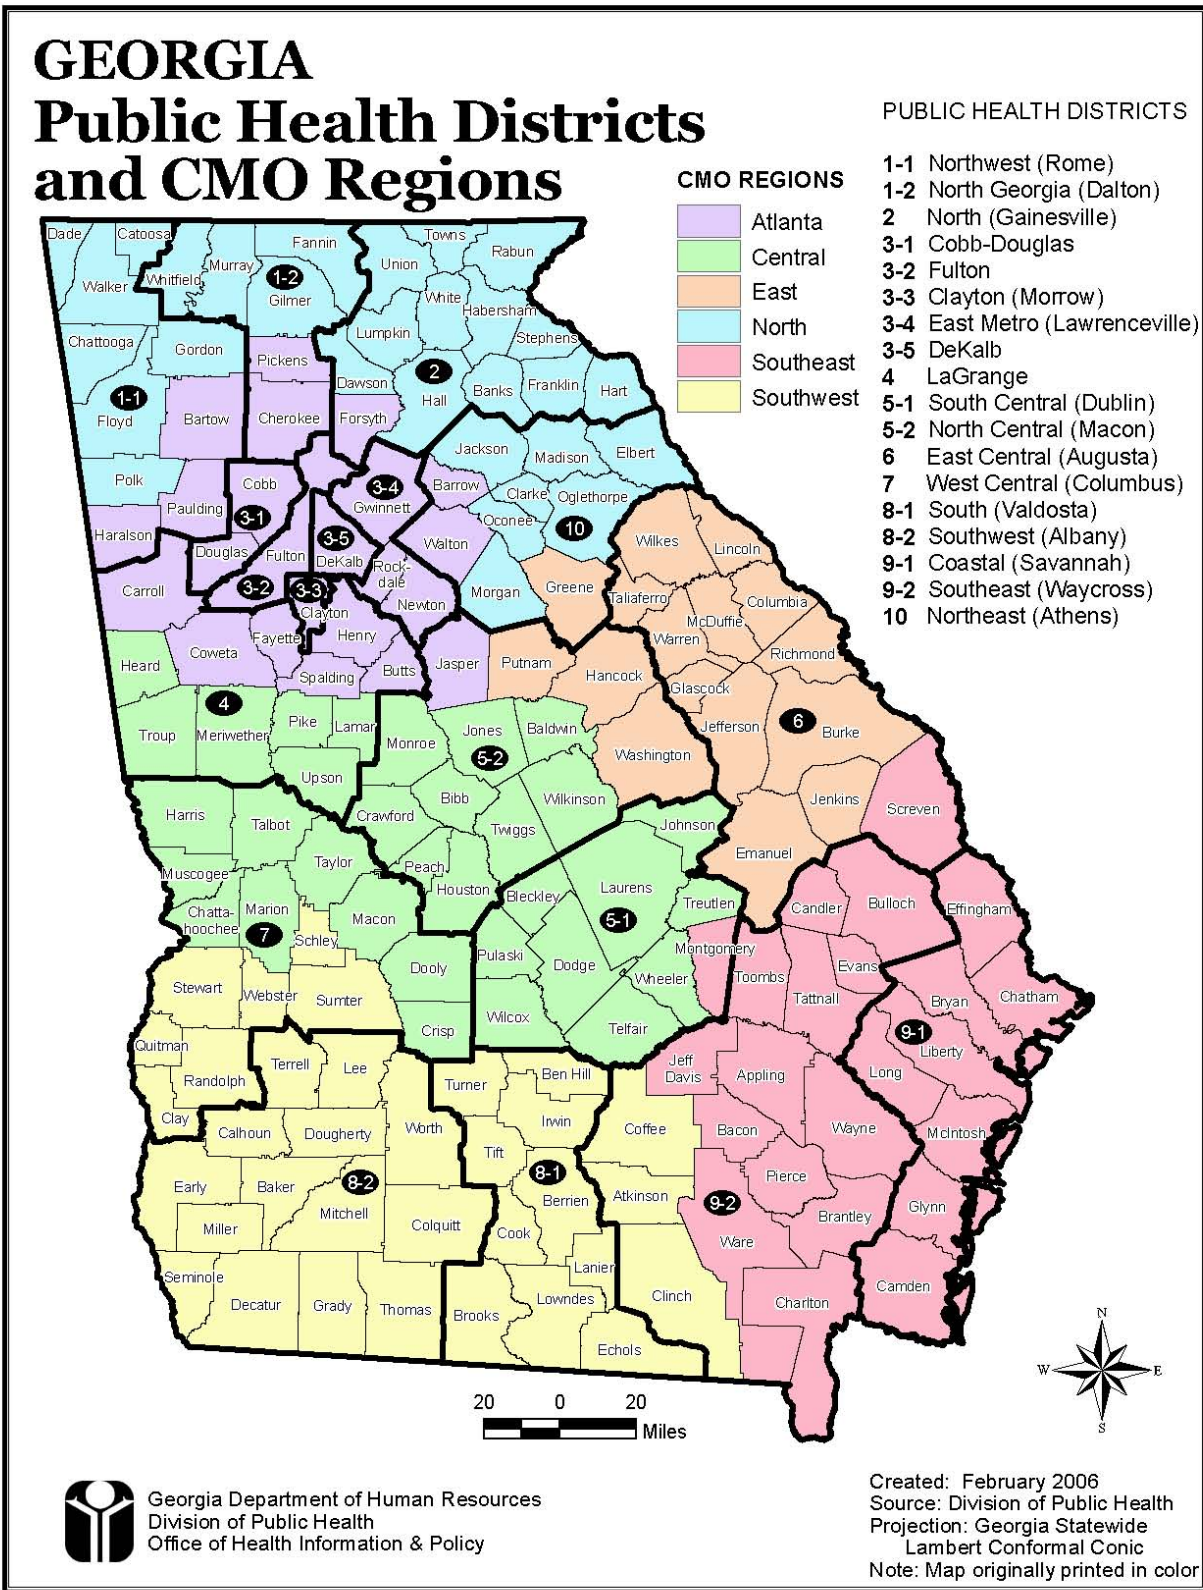

- Approximately 31.5 percent of Georgia children under age 19 were eligible for the Free and Reduced Lunch Program in school year 2004 - 2005, a 22 percent increase from 2000.
- The numbers of Medicaid enrolled children, 2000 through 2005 (6 service years), grew by 51 percent and for PeachCare by 137 percent, or an average growth³ of 10 percent per year for Medicaid and 27 percent per year for PeachCare.
- Overall access to Medicaid and PeachCare dental providers has kept pace with growth in Medicaid children but not with the growth in PeachCare children. Growth in PeachCare enrollment averaged 27 percent per year between 2000 and 2005, while the growth in “Participating”⁴ providers grew 13 percent annually and the growth in “Active” providers grew 11.3 percent annually.
- Approximately 13.3 percent of Georgia children were enrolled in PeachCare in 2005, and 49.5 percent were enrolled in Medicaid.
- Across the state, the number of children enrolled in Medicaid and PeachCare who received any dental service increased from 24 percent in 2000 to 40.7 percent in 2005, an average increase of 3.3 percent per year.
- In 2005, Medicaid enrolled children in the Athens (37.2) and Augusta (40.2) Districts and percentages of PeachCare children in the Augusta (56) and Lawrenceville (56) Districts had the highest percentages of those who received any dental service.
- The proportion of Medicaid and PeachCare enrolled children who received a preventive service rose from 21.6 percent in 2000 to 38.2 percent during 2005, for a total increase of 16.6 percent or an average increase of 3.3 percent per year.
- The proportion of Medicaid and PeachCare enrolled children who received a restorative service peaked in 2002 (12.3 percent) and fell to 9.8 percent in 2005.
- In 2005, the percentage of PeachCare children who received preventive (50.5) or restorative (11.2) dental services was greater than the percentage of Medicaid children receiving the same services (preventive 33.4 and restorative 8.9 percent).
- In 2005, the Lawrenceville (53.4 percent) and Augusta (53.2 percent) Districts achieved the highest proportions of PeachCare children receiving at least one preventive dental service. The Augusta District achieved the highest proportion of Medicaid children receiving at least one preventive dental service (37.3 percent).
- Statewide, from 2000 through 2005, Georgia dentists “Participating” in the Medicaid and PeachCare programs increased from 839 to 1,287 and those “Active” in the programs increased from 598 to 1,056. This represents a total increase of 65.2 percent (13 percent average growth per year) in “Participating” and 56.6 percent (11.3 percent average growth per year) in “Active” service provided from all enrolled dentists.

³ Based on five years of growth, with 2000 as the base year.

⁴ “Participating” means the dentist saw at least one child in a calendar year, while “Active” means the dentist saw at least one child per week.

- In 2005, the Dublin District contained the highest proportion of Medicaid and PeachCare enrolled dentists who are both “Participating” and “Active”.
- The Clayton District has the lowest ratio of dentists per 1,000 population (.25); the Dublin District has the fewest numbers of dentists (36); and the Columbus District has the most counties without a dentist (6).

*Denominator is the total number of children who had received any preventive dental service in CY2005.

**Denominator is the total number of children who had received any restorative dental service in CY2005.

Note 1: District PeachCare and Medicaid column totals are not intended to add to the statewide total. The statewide total is a tally of unique individuals and takes into account the fact that children move from one district to another over time. See the methodology section for further explanation.

Note 2: District PeachCare and Medicaid row totals are not intended to add to the all programs total. The all programs total is a tally of unique individuals and takes into account the fact that children switch between the Medicaid and PeachCare programs over time. See the methodology section for further explanation.

Figure 2: Medicaid and PeachCare Enrolled Children under Age 19 Receiving “Any Dental Service” – CY2000, CY2001, CY2002, CY2003, CY2004, & CY2005 by Statewide Totals

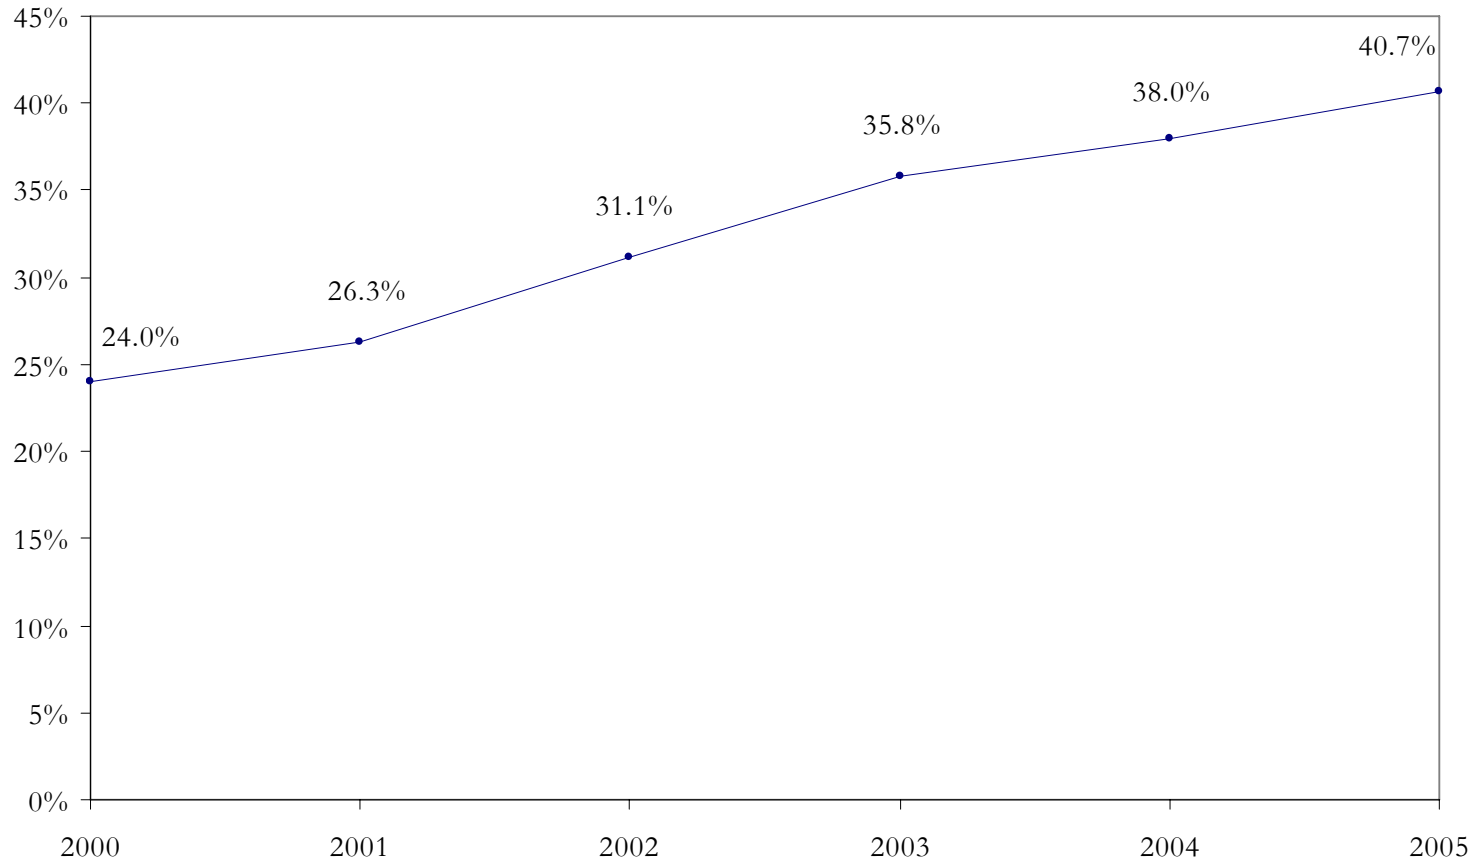

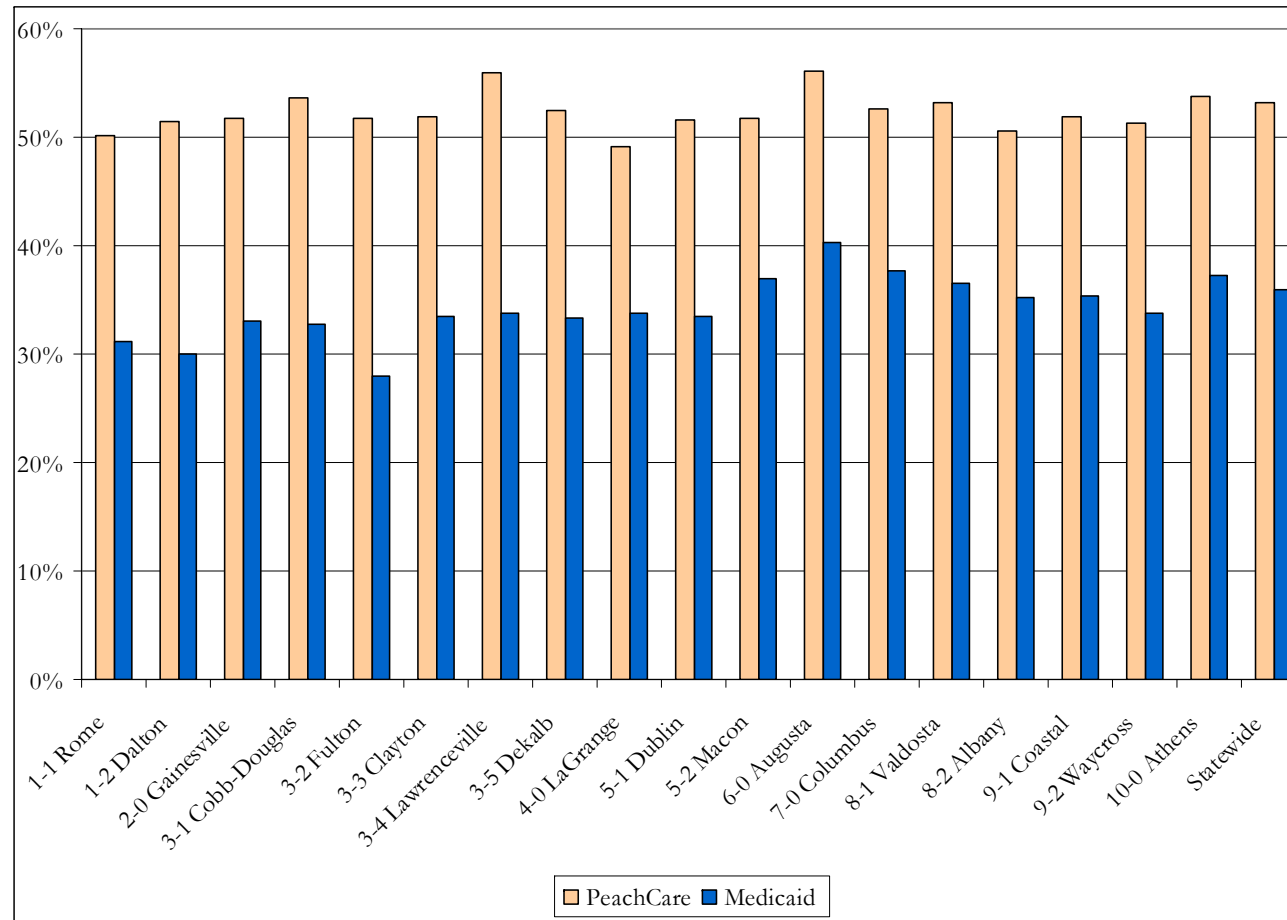

Figure 3: Percent of Medicaid and PeachCare Enrolled Children under Age 19 Receiving “Any Dental Service” CY2005 by District and Statewide

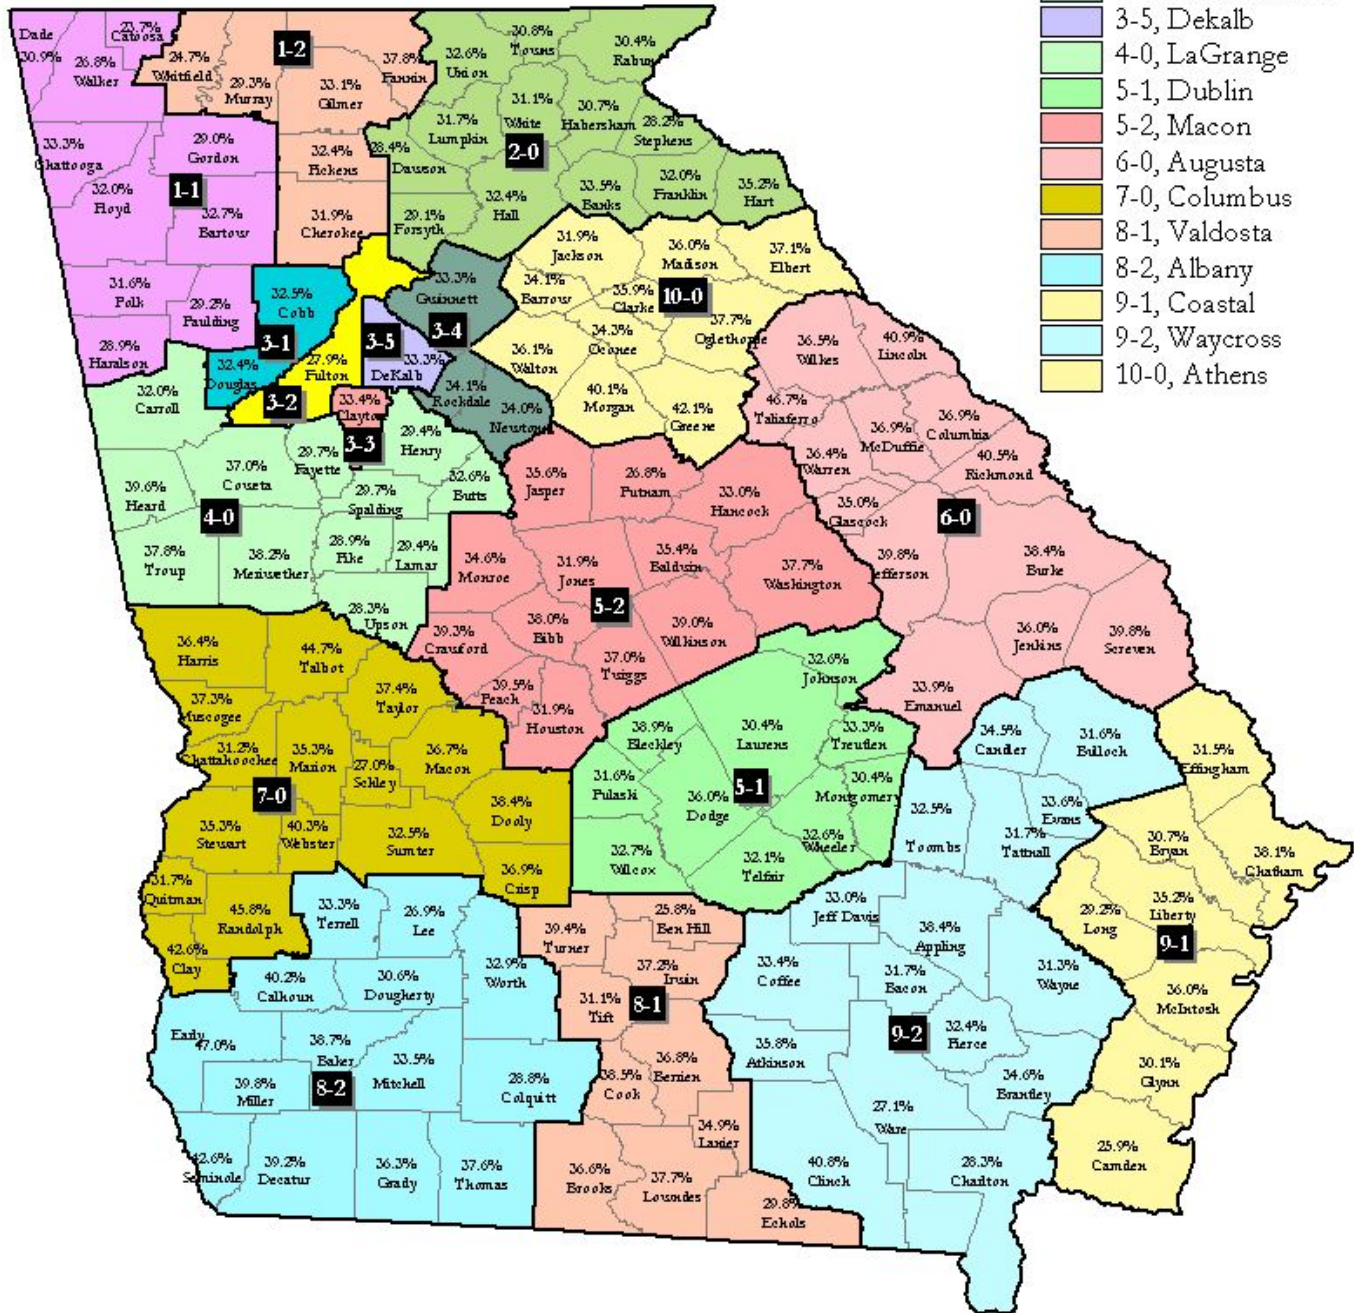

Note 1: District and county column totals are not intended to add to the statewide total. The statewide total takes into account that children move from one district or county to another over time.

Note 2: District and county row totals are not intended to add to the all programs total. The all programs total takes into account that children switch programs over time. Row percentages are based on enrollment number denominators contained within the row. See the methodology section for further explanation.

Healthy People 2010 Oral Health Objective #21-21: Increase the proportion of low-income children (and adolescents) who received any preventive dental service during the past year. Healthy People 2010 National Target: 57 percent.

Note 1: District and County column totals do not add to the statewide total. The statewide total takes into account that children move from one district or county to another over time. See the methodology section for further explanation.

Note 2: District and County row totals do add to the all programs total. The all programs total takes into account that children switch between the programs over time. Row percentages are based on preventive services number denominators contained within the row. See the methodology section for further explanation.

Note 3: Preventive dental CPT codes = D1120, D1110, D1203, D1351, D1510, D1515, D1525, D5550; restorative dental CPT codes = D2110, D2120, D2130, D2131, D2140, D2150, D2160, D2161, D2330, D2331, D2332, D2335, D2380, D2381, D2382, D2385, D2386, D2387, D2751, D2920, D2930, D2931, D2932, D2940, D2950, D2951, D2970.

Healthy People 2010 Oral Health Objective #21-10: Increase the proportion of children (and adults) who use the oral health care system each year. National Target: 56 percent.

Healthy People 2010 Oral Health Objective #21-21: Increase the proportion of low-income children (and adolescents) who received any preventive dental service during the past year. National Target: 57 percent.

* These numbers do not include "GAP" children: those children whose families do not qualify for public reimbursement programs, are too poor to purchase dental insurance, and lack access to dental providers.

**FRLP is the Federal Department of Education Free and Reduced Lunch Program. <http://www.doe.k12.ga.us/schools/nutrition/policy.asp>

Some county-level estimates may be greater than 100% due to precision of county level July 2005 Census estimates and children being counted in both Medicaid and PeachCare if eligibility changed throughout the year.

Definitions: An “Enrolled” dentist has registered as a Medicaid/PeachCare provider, and has been issued a provider number by the Medicaid/PeachCare Program. A “Participating” dentist saw at least one Medicaid or PeachCare child during CY2005. An “Active” dentist saw at least one Medicaid or PeachCare child per week in CY2005. Medicaid enrolled dentists are obtained from the CY2005 Medicaid provider file. Participating and Active status is calculated from CY2005 Medicaid claims. “N/A” means that Medicaid provider enrollment data are not available for a particular county or a particular year.

Figure 14: Enrolled Dentists “Participating” and “Active” in Medicaid and PeachCare for CY2000, CY2001, CY2002, CY2003, CY2004 & CY2005

A “Participating” dentist saw at least one Medicaid or PeachCare child during the calendar year. An “Active” dentist saw at least one Medicaid or PeachCare child per week during the calendar year.

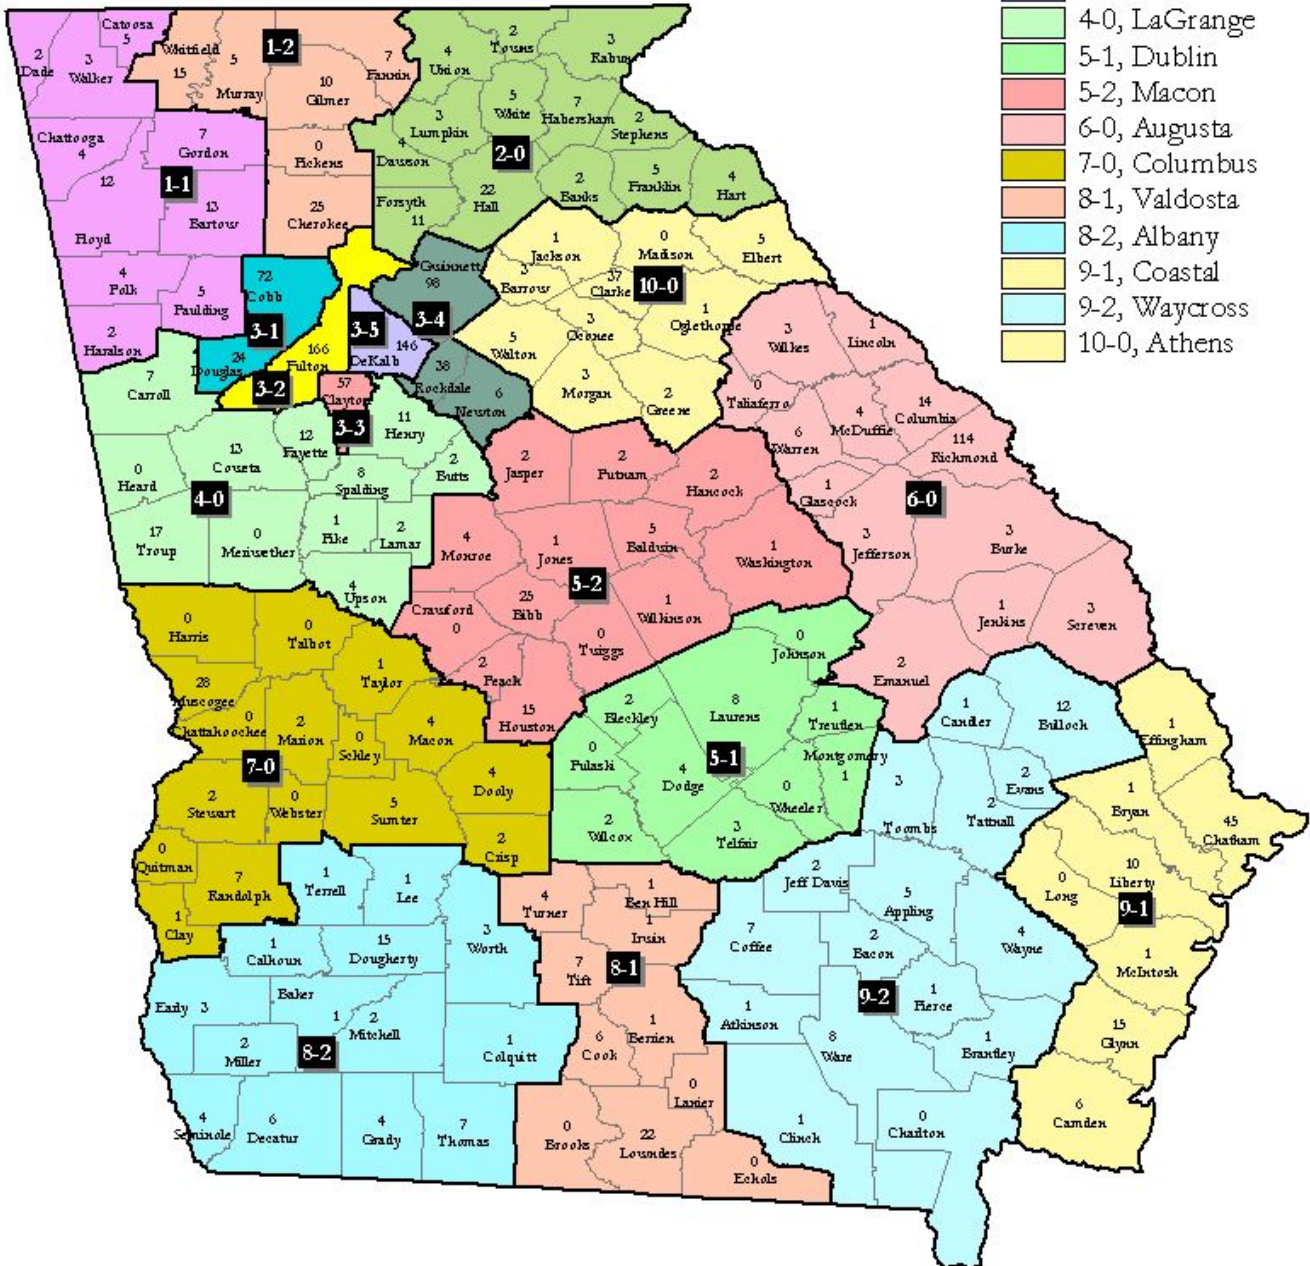

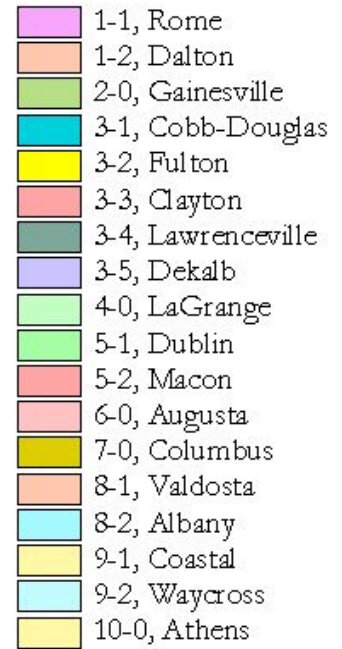

Figure 15: Percent of Enrolled Dentists “Participating” and “Active” in Medicaid and PeachCare Statewide per District CY2005

Definitions: A “Participating” dentist saw at least one Medicaid or PeachCare child during CY2005. An “Active” dentist saw at least one Medicaid or PeachCare child per week in CY2005. The total numbers of enrolled dentists per district are listed in Figure 14.

Total per 1,000 District Population						

Table prepared with information provided by the Georgia Board of Dentistry, August 2006. Count of licensed dental professionals by county is based upon submitted addresses for license application or renewal, which may be either a residential or business address. Each professional is counted only once.

⁵ Totals as of August 10, 2006.

Counties - 159	
94 Counties Designated as **Dental Health Professional Shortage Areas	

The number of Medicaid/PeachCare dental providers is the most current available data provided by the CY2004[^] Medicaid claims data analysis. The numbers of licensed dentists is from the most current available data provided by the **Georgia Board of Dentistry** (~Rosters current as of 8-15-06).

[Georgia Board of Dentistry](http://www.sos.state.ga.us/plb/dentistry/) <http://www.sos.state.ga.us/plb/dentistry/>

***District Health Departments** that do not provide direct dental services at a fixed site provide school based prevention services. These services may include dental sealants, oral health prevention education, fluoride mouthrinse programs; and minor oral surgeries and dental fillings.

[Georgia Division of Public Health | Oral Health](http://health.state.ga.us/programs/oral/index.asp) <http://health.state.ga.us/programs/oral/index.asp>

**This district also has one fixed school health clinic site, with a dental clinic.

County Health Departments are listed on the Georgia Department of Human Resources, Division of Public Health web site (some counties have more than one CHD location). [Georgia Division of Public Health Counties and Districts](http://health.state.ga.us/regional/index.asp) <http://health.state.ga.us/regional/index.asp>

Data on public schools was provided by the **Georgia Department of Education**; Data Collection and Reporting Office. [Georgia Department of Education, Office of Technology Services, Atlanta Georgia](http://datawarehouse.hrsa.gov/)

The **Federally Qualified Community Health Centers** (FQHC) are comprised of a main Grantee FQHC and satellite sites of the Grantee. Satellite sites of a single Grantee may be located in various counties and more than one health district. Not all counties have FQHCs. Because of this, the FQHC resource list is organized by site location, rather than by Grantee location.

*The US Department of Health and Human Services, Health Resources and Services Administration (HRSA) provides data on Federally Qualified Community Health Centers (FQHC) and Dental Health Professional Shortage Areas (DHPSA) on the ***Geospatial Data Warehouse (GDW)** website. A count of FQHCs and DHPSAs was obtained from this website. This information was reconciled with data obtained from the ***Bureau of Primary Health Care** (BPHC) and local resources. *Information provided in this table is based upon the most recent data available (8-24-06) from the HRSA GDW and the BPHC (downloaded 8-29-06). This data is updated quarterly.
